Orthodox Eastern Church that part of the Christian Church centered on the patriarchate of Constantinople, which became separate from western Christendom in 1054, when it refused to accept the supremacy of the pope and was excommunicated by Pope Leo IX. This excommunication was annulled in 1965. The Orthodox Church comprises 16 autocephalous patriarchates. Four of them date from Apostolic times but they diminished in influence with the rise of Islam. They are Constantinople (310,000, created 381), Alexandria (90,000, created 537), Antioch (2,587,000 created 5,1?), and Jerusalem (45,000, created 451). The largest Churches are the Russian (end of 10th c., autocephalous in 1448, and dominant since, though its numerical strength, perhaps 100 million, is uncertain), the Greek (7 million, autocephalous in 1833), the Rumanian (4th c., 14 million, autocephalous 1925), the Serbian (9th c., 7½ million, autonomous 1219 and fully autocephalous 1879) and the Bulgarian (9th c., 6 million, autocephalous 917). The others are the Georgian, Albanian, Finnish, Polish, Cypriot, Czechoslovak and Mt Sinai. Orthodox communities in W. Europe, Australia and North and South America belong to the patriarchate of Antioch or that of Jerusalem. There are over 150 million Orthodox in the world. Before its break with Rome the Orthodox Church suffered several schisms as a result of Nestorian and Monophysite heresies. These produced the Ethiopian Church (mid-4th c., 5 million), the Armenian Church (end of 5th c., 4 million), the Coptic Church (mid-5th c., 3,000,000) and several smaller schismatic bodies. The leading Orthodox patriarchates are represented on the World Council of Churches. Doctrinally the orthodox differ little from Rome, but they accept only the first seven ecumenical councils (until 787), and deny purgatory and the Immaculate Conception. Emphasis is placed on ritual, monasticism and mysticism, and the priesthood is not always celibate. Historically they are closely associated with eastern European nationalism.

ox·y·a·cet·y·lene (ɔksiəsét'li:n) *adj.* of, consisting of or using a mixture of oxygen and acetylene, esp. as burned in a blowtorch to provide a sufficiently high temperature for welding or cutting metals [OXYGEN + ACETYLENE]

ox·y·ac·id (ɔksiæsid) *n.* (*chem.*) an oxygen-containing acid

ox·y·gen (ɔksidʒən) *n.* a colorless, tasteless, normally gaseous element (symbol O, at. no. 8, at mass 15.9994) [F. *oxygène*]

—Oxygen forms about 1/5 of the earth's atmosphere, 8/9 by weight of water, and a considerable proportion by weight of organic matter and of many minerals. It is the most abundant element of the earth's atmosphere and crust, and is essential to animal and plant life. It combines readily with many other elements to form oxides, combustion and respiration both involving such combination. Pure oxygen is extracted from liquefied air. It is used in oxygen blowpipes and oxyhydrogen and oxyacetylene flames for cutting and welding. The use of large amounts of oxygen in steelmaking furnaces speeds the decarbonizing reaction and makes it possible to treat lower grades of ore. Chemical applications of oxygen include the manufacture of concentrated nitric acid from ammonia and the oxidation of hydrocarbons obtained from petroleum

ox·y·ge·nase (ɔksidʒəneis) *n.* (*biochem.*) enzyme that makes possible the use of oxygen from the atmosphere by an organic cell

ox·y·gen·ate (ɔksidʒəneit) (*pres. part.* **ox·y·gen·at·ing** *past* and *past part.* **ox·y·gen·at·ed** *v.t.* to impregnate or treat with oxygen to fill (blood etc.) with oxygen by breathing **ox·y·gen·a·tion** *n.* [F. *oxygéner*]

oxygen-hydrogen welding a process of gas welding by burning a mixture of oxygen and hydrogen, producing very high temperatures

ox·y·gen·ize (ɔksidʒənaiz) *pres. part.* **ox·y·gen·iz·ing** *past* and *past part.* **ox·y·gen·ized** *v.t.* to oxygenate

oxygen tent a tentlike canopy, placed over a patient's bed, in which a steady flow of oxygen is supplied to the patient

HISTORY: Pakistan was formed (1947) from the predominantly Moslem parts of India, as a result of the campaign led by Jinnah and the Moslem League. The partition was followed by riots in which thousands were killed. Several million Hindu refugees fled to India, and as many Moslems migrated from India to Pakistan. The newly formed dominion was at war with India over the status of Kashmir (1947–9; [illegible] imposed a cease-fire). Pakistan struggled against economic difficulties and food [illegible]. It joined the South East Asia Treaty Organization (1954) and the Central Treaty Organization (1955). It became a republic within the Commonwealth (1956) but its constitution was suspended (1958) after a military coup and Ayub Khan assumed the presidency. [illegible] preceded by a [illegible] government. The long-standing dispute with India over Kashmir broke briefly into open war (1965). Anarchy spread (Mar. 1969) through wide areas, esp. of E. Pakistan. Ayub Khan resigned as president in favor of Gen. Yahya Khan. In 1971 the army put down an insurrection by partisans claiming independence for the east [illegible]. The influx into India of millions of refugees contributed to the outbreak (Dec. 1971) of a new conflict between India and Pakistan. The defeat of the Pakistani army led to the proclamation of a republic under the name Bangladesh (Free Bengal) in the territory comprising E. Pakistan. Yahya Khan resigned and was succeeded by Ali Bhutto. Under a third constitution (1973) Bhutto became prime minister of Pakistan until the army seized control again (1977). Gen. Zia ul-Haq became president (1978), and Bhutto was arrested and hanged. In an Islamic revival, a new series of laws was passed (1979) based on Islamic tenets, and the Islamization was endorsed by referendum (1984). The constitution was amended (1985) to [illegible] Zia's powers and allow him to appoint the prime minister. An influx of over 3,000,000 Afghan refugees burdened Pakistan's economy and strained its relations with the U.S.S.R.

Pal·es·tine (pælɪstaɪn) a region on the eastern shore of the Mediterranean, now included in Israel. It is the Holy Land for Jews (as the land promised them by God) and for Christians (as the birthplace and home of Jesus Christ), and is

referred to in the Old Testament as Canaan. It developed a pastoral economy (4th millennium

After several other invasions, Egypt regained control (c. 1300 BC), but Philistines settled on the coast, Aramaeans in N. Syria and Israelites in the hill country (c. 1300–1000 BC). In the

1040, c. 932 BC), but split (c. 932 BC) into two kingdoms, Israel in the north and Judah in the

ians under Sargon II, and the latter was conquered (586 BC) by the Babylonians under Nebuchadnezzar II. The whole area was conquered by Cyrus II of Persia (539 BC) and by Alexander the Great (333 BC). Attempts to impose Hellenism provoked the revolt of the Maccabees (c. 168–142 BC), after which the Jews obtained political independence (142–63

puppet Herod. Christ was born in Bethlehem. Increasing Roman control provoked a Jewish

and, after 330, part of the Byzantine Empire. It fell to the Arabs (638), and despite the Crusades

1096–1250) remained under Muslim influence, being conquered (1516) by the Ottoman Turks. It continued under their rule until 1918, despite a brief invasion (1799) by Napoleon and Egyptian occupation (1831–40) under Ibrahim Pasha. The growth of Zionism (1890s) led to Jewish colonization from Europe. Turkish rule was ended by the British invasion (1917–18) under Allenby, aided by Lawrence. The Balfour Declaration (1917) established Palestine as the site of a national home for the Jews, and aroused bitter Arab opposition. Palestine became a British mandate (1920), but hostilities soon broke out between the Jews and Arabs. Jewish immigration increased (1930s) as a result of persecution in Europe and, despite a British attempt to limit it (1939), continued to grow during the 2nd world war. The U.N. recommended partition between the Arabs and Jews, but both sides refused (1947). The British mandate ended (May 14, 1948), and the State of Israel was proclaimed. After war (1948–9) between Israel and some states of the Arab League, Israel greatly increased her territory, Jerusalem was divided, Jordan acquired part of Palestine west of the Jordan and the Gaza Strip was occupied by Egypt. After the lightning third Israeli-Arab war (June 1967) Israel occupied Jordanian Palestine west of the Jordan as well as the Gaza Strip, while Jerusalem was reunited. The UN General Assembly reaffirmed the Palestinians' right to self-determination and national sovereignty (1974), and Jordan renounced its claims by signing the Rabat resolution proclaiming the Palestine Liberation Organization (PLO) the sole legitimate representative of the Palestinian people. None of the programs or strategies offered or advocated has provided a solution to the problem of a homeland for the Palestinians and many still live in refugee camps

Palestine Liberation Organization (pælɪstaɪnlɪbəreɪʃənɔrgənɪzeɪʃən) (*abbr.* PLO) an organization composed of several Palestinian groups attempting to 'liberate' Palestine from what the view as an illegitimate Israeli state. Formed (1964) to represent Palestinian Arabs, it considers itself their political and military arm. Its charter vests supreme policy-making authority in the Palestine National Council. It was proclaimed sole legitimate representative of the Palestinian people by the Arab states (1974) and was recognized by the U.N. General Assembly as the 'representative of the Palestinian people.' Yasir Arafat became PLO chairman in 1969, but since 1983 the organization has been divided into pro- and anti-Arafat factions, the latter largely backed by Syria. Expelled from Jordan (1971), PLO forces established themselves in Lebanon, whence they launched attacks on Israel. Driven from Beirut (1982) by the Israeli army, they scattered throughout the Arab world. In 1985, Arafat and Jordan's King Hussein announced that the PLO would accept a negotiated settlement of the Arab-Israeli dispute, but Israel continued to refuse to negotiate with the PLO and the violence escalated. The PLO continued to be linked to and take credit for numerous terrorist activities worldwide

Paraguay a republic (area 157,000 sq. miles, pop. 3,270,000) of central South America. Capital: Asunción. People: Spanish-Guarani Indian mestizos (93%), with minorities of tribal Indians, Italians, Japanese and Germans. Religion: predominantly Roman Catholic. Languages: Spanish, Guarani. The land is 54% forest, 4% arable, and 40% suitable for pasture. The River Paraguay divides the country. The west is flat and largely semidesert (the Gran Chaco), with some forest. The east (containing 95% of the population) is a rolling plain, cultivated in the south, with hills (rising to 2,800 ft) separating the Paraguay and Paraná basins, and great rain forests (the Selva) in the north. In the center, on both sides of the Paraguay, is the Campo: marshland and savanna (cattle raising). Average temperatures (F.): Asunción 62° (Jul.) and 80° (Jan.), the Chaco 70° (Jul.) and 100° (Jan.). Rainfall: 80 ins near Brazil, 50 ins east of Asunción, 44 ins in Asunción, 32 ins in the Chaco. Livestock: cattle, horses. Agricultural products (eastern region): manioc, corn, cotton, sugarcane, peanuts, sweet potatoes, beans, onions, yerba maté, rice, tobacco, coffee, fruit. Forest products: cedar, hardwoods, quebracho extract, petitgrain oil, tung oil. Mineral resources (largely unexploited): iron, manganese, copper, mica. Industries: rum, meat, textiles, lace, consumer goods. Exports: cotton, quebracho extract, lumber, hides, tobacco, meat, yerba maté, vegetable oils. Imports: food, textiles, vehicles, machinery, chemicals, fuels and oil, paper. Port: Asunción (on River Paraguay, over 900 miles from the sea). University

Asunción (1889). Monetary unit: guaraní (100 centimos). HISTORY: Paraguay, inhabited by Guaraní Indians, was ruled by Spain (16th c.–1811), which made it part of the viceroyalty of Río de la Plata (1776). It revolted, and declared its independence (May 14, 1811). Paraguay prospered under a series of dictatorships, but in [illegible] against Argentina, Brazil, and Uruguay it lost 305,000 out of a population of 525,000, and of the survivors only 28,000 were men. Its economy was shattered. Again in the Chaco War [illegible] for the 20,000 sq. miles of borderland it gained in the wilderness of the Gran Chaco. The country remained neutral for most of the 2nd world war, and joined the U.N. (1945). Civil War (1947) and political instability were followed in 1954 by the election of Gen. Alfredo Stroessner. Ruling dictatorially, he introduced certain improvements, esp. in communications, and reforms, esp. women's suffrage (1963). He continued in power, being reelected to succeeding five-year terms.

Paris the capital (pop. 2,183,000, with agglom. 8,510,000), and economic and cultural center of France, on the Seine in the central Paris basin. It is the country's chief river port and communications center, and concentrates a quarter of France's industry. luxury goods (esp. fine furniture, leather goods, haute couture and ready-made clothing, jewelry) in the city, heavy industry (mechanical, electrical and aeronautical engineering, motorcars, metallurgy, chemicals, food processing) in the suburbs. The city's geometric center and original site is the Île de la Cité in the Seine, containing the law courts, Sainte Chapelle (the Gothic chapel of St Louis, 1242–8) and Notre Dame. The left bank contains the university (or Latin) quarter, most of the remaining medieval buildings and, far west, the Eiffel Tower. The right bank, behind the Louvre and the Tuileries gardens, which stretch along the river, contains the financial and commercial section laced by the system of squares and boulevards laid out by Haussmann (19th c.), notably, the Place de l'Étoile (1836, surrounding the Arc de Triomphe) and the Place de la Concorde, with the Avenue des Champs-Élysées connecting them. Government buildings are spread throughout the center. Cultural institutions: university (1215), five national theaters, Louvre, Museum of Modern Art (1947), National Library, numerous other museums, academic and scientific institutes, and national schools. HISTORY Paris developed as a Roman town (1st c. B.C.), and according to tradition, was saved from the Huns by St Geneviève (5th c.). It was temporarily the Merovingian capital under Clovis I, and was besieged (885–7) by the Vikings. Its importance increased when Hugh Capet became king of France (987). The Sorbonne made it a center of theological learning (13th and 14th cc.). Louis XI[V] and Louis XV gave Paris some of its finest public buildings. Paris was the center of the French Revolution. par·lia·ment (pɑ́rləmənt) *n.* the supreme legislative body of certain countries. The parliament of the United Kingdom comprises the sovereign, the lords spiritual and temporal assembled in the House of Lords, and the representatives of the counties, boroughs etc. meeting in the House of Commons [M.E. fr. O.F. *parlement*, a speaking]

The English parliament developed out of the king's council of the 13th c., a feudal assembly of leading barons summoned at the king's will. Knights from each county were summoned to assemblies in 1213, 1227 and 1254, and Simon de Montfort's parliament (1265) also included representatives from the boroughs. Organization remained vague, however, even after Edward I's Model Parliament (1295). Parliament assumed the right to make laws (14th c.) and to control taxation (1340), and the division into Lords and Commons became permanent in the reign (1327–77) of Edward III. By 1377, parliament was claiming the right to examine public accounts and to impeach the king's officers, and by the end of the 15th c. its members claimed freedom of speech and freedom from arrest. The Commons increased their demands for privilege during the reign (1558–1603) of Elizabeth I, and serious constitutional conflicts marked the reigns of James I and Charles I. The Long Parliament (1640–53) opposed Charles in the Civil War (1642–52) and England was ruled (1653–60) under a written republican constitution. The Restoration (1660) renewed the problem of the relationship between king and parliament, and out of the opposition to the succession of James II arose the beginnings of the party division into Whigs and Tories. After the Glorious Revolution (1688), parliament was able to assert its supremacy in the Bill of Rights (1689) and the Act of Settlement (1701), though the administration and the executive remained in the hands of the sov-

ereign Parliament was enlarged by the Act of Union (1707) to represent Great Britain and the 18th c. saw the development of political parties and of the cabinet. The office of prime minister also emerged at this time, though the prime minister was dependent on royal patronage to manage parliament. The Reform Act of 1832 slightly increased the electorate and began to redistribute seats, that of 1867 enfranchised urban workers, and that of 1884 virtually completed manhood suffrage. The ballot was introduced (1872) and the suffrage was extended (1918) to women of 30 and over, and (1928) to women of 21 and over. The Liberals (formerly the Whigs), the Conservatives (formerly the Tories) and, in the early 20th c., the Labour party developed nationwide organization. The Parliament Act (1911) limited the power of the House of Lords, giving legislative supremacy to the Commons and reduced the length of a parliament from seven years to five. The House of Lords admitted life peers and women (1958). Modern executive government is exercised, in the sovereign's name, by a cabinet and ministry represented in both Houses, and ultimately responsible to the Commons. The royal right to veto legislation has not been exercised since the 18th c.

Pas-cal (pæskæl), Blaise (1623–62), French scientist, mathematician, philosopher and writer. He wrote mathematical and scientific treatises of great importance making contributions to hydraulics, pure geometry etc., and laid the foundation of the theory of probability (upon which Leibniz was to build his theory of the calculus). But his chief work was in Christian apologetics. He came into contact with the Jansenists in 1646. On Nov. 23, 1654 he had a mystical experience: he withdrew to Port Royal, lived ascetically, and wrote the brilliant 'Provincial Letters' (1656–7) in defense of the Jansenists, with Jesuit casuistry as the special target for attack. His most famous work, the so-called 'Pensées' (1670), is a series of fragments of a work in which Pascal set himself to persuade free thinkers of the truth of Christianity, broadly by exploring the limits of reason and the function of the imagination and affirming that at a certain point a leap into faith has to be made (the 'wager', as he put it: if you win you win all, if you lose you lose all, but have nothing to lose). On the literary level the 'Pensées' are unsurpassed examples of French classical prose: lucid, subtle and powerful. They can be said to have contributed to that science of the human heart from which the greatest works of French classical literature sprang

Pe·la·gi·an·ism (pəleidʒiənizəm) *n.* the heresy originated by Pelagius. It denied original sin and the need for baptism, and held that grace is not necessary for salvation. It asserted that free will and the law are sufficient for man to live without sin. It arose as a reaction to gnosticism and Manichaeism, in the interests of a higher morality, which Pelagius found lacking in Rome. Opposed by St Augustine of Hippo, an attempt to heighten human responsibility, it fell into the extreme of diminishing divine grace. Opposed by St Augustine of Hippo, the heresy and Pelagius were condemned at several synods (411–18). A form of the heresy, with emphasis on free will, arose in Britain (c. 400), and Pope Leo I was condemned (528–9). Pelagianism long continued as a trend in Christian philosophy

periodic law a statement in chemistry: the chemical and physical properties of elements depend upon the structure of the atom and vary

with the atomic number in a systematic and roughly periodic way (*PERIODIC TABLE)

periodic table (*chem.*) a tabular arrangement of the elements based upon atomic number and emphasizing the periodic recurrence of properties. The modern periodic table in long-period form contains horizontally a very short period of two elements, two short periods of eight elements each, two long periods of 18 elements each, a very long period of 32 elements, and an incomplete period. Vertically there are 16 columns (excluding the lanthanide series and incomplete actinide series) comprising eight groups divided into two subgroups each. Elements to the left and in the center are metals, those to the right nonmetals. Metallic properties are most pronounced for elements in the lower left-hand corner, and nonmetallic properties most pronounced for elements in the upper right-hand corner. Transition from metallic to nonmetallic properties is usually gradual and continuous from left to right. The structure of the periodic table and the periodic law follow directly from the quantized structure of the atom

Per·sia (pə:rʒə, pə:rʃə) the ancient, and (since 1949) the official alternative name of Iran. (For geography *IRAN). HISTORY. The Iranian plateau saw the growth of an early civilization at Elam (c. 4000 B.C.). The Persians, an Aryan people, settled in S. Persia (2nd millennium B.C.), while the Medes, also an Aryan people, settled N.W. Persia (1st millennium B.C.), coming into conflict with the Assyrians (9th c. B.C.). The Medes established a strong kingdom (7th c. B.C.) and conquered Assyria (c. 616–606 B.C.), but were themselves conquered by the Persians (mid-6th c. B.C.) under Cyrus II. His successors, the Achaemenids, built up a vast empire extending from Egypt to the Punjab and from the Dardanelles to Samarkand. The empire, founded on Zoroastrianism, was remarkable for its efficient organization, based on that of the Assyrians, and for its art, influenced by Egypt and Babylonia. The empire was weakened by the dynastic disputes of Cambyses II and Darius I, and by the Greek victories over Darius I and Xerxes I during the Persian Wars (499–449 B.C.). It fell (331 B.C.) to Alexander the Great at Arbela, and power passed to the Seleucids. Parthia broke away (mid-3rd c. B.C.) and formed an empire which rivaled Rome and which in turn was replaced by the Sassanids (c. 226–c. 641 A.D.), under whom the arts again developed. The Arabs took Ctesiphon, the capital (c. 641), and brought Islam to the whole country. Persia prospered under the Umayyad and Abbasid caliphates. Under the latter, the Seljuk Turks gained control, and poetry, philosophy, mathematics and astronomy flourished (10th–13th cc.). Genghis Khan incorporated Persia in the Mongol domains (1220), and a period of anarchy and destruction ensued until the Safavids gained power (1502–1736). This dynasty was at its height under Abbas I, in whose reign (1587–1629) Persian territory was extended and the Portuguese driven from the bases they had established on the Persian Gulf. Ottoman, Russian and Afghan raids were put down (early 18th c.) by Nadir Shah, who ruled despotically (1736–47). A period of civil war was ended (1794) by the Kajar dynasty (1794–1925), under whom Persia was drawn into European power politics, forming treaties with France (1807) and Britain (1814), and ceding most of her territory in the Caucasus to Russia (1828). Britain and Russia guaranteed Persian independence (1834), but Britain forced Persia to withdraw from Afghanistan (1857). The discovery of oil (1901) increased Western financial interest in Persia. A liberal constitution was introduced (1905) and Russia and Britain agreed to divide Persia into two zones of influence (1907). An army officer, Reza Khan, staged a coup d'etat (1921), established a dictatorship, and assumed the title of Reza Shah Pahlavi (1925). Under his rule, Persia was rapidly modernized. The name of the country was changed (1935) to Iran

ans, mostly Indians, into Cooperacion Popular projects for village improvement. Such a program, beyond Peru's fiscal capacity, was further hurt by scandal and corruption. Belaunde's failure to make good his promise to expropriate the U.S.-owned International Petroleum Co. (IPC, a subsidiary of Standard Oil Company, New Jersey), which had been drilling in Peru since 1924, and pressure from the rich landowners, brought about his overthrow (1968) by a junta headed by Gen. Juan Velasco Alvarado. Velasco introduced a vigorous agrarian reform program. His seizure of U.S. tuna clippers (1969) for violating Peru's territorial waters (extended unilaterally to 200 miles) angered the U.S.A. His confiscation, within six days of his inauguration, of most of IPC's property posed for the U.S. government the dilemma of having either to apply the Hickenlooper amendment or risk the alienation of all Latin America by waging 'economic aggression'. A compromise with the U.S.A. was worked out, and his reform program thus lost some of its impact. A violent earthquake ravaged (May 31, 1970) 300 miles of the Pacific coast region and killed 50,000 people. In 1975, with Peru facing spiraling inflation and massive foreign debt, Velasco Alvarado's government was replaced by a military junta led by Gen. Francisco Morales Bermudez. The constitution was suspended and the parliament dissolved. A new constitution was prepared by an assembly elected (1978) for the purpose and elections were held (1980) to return Peru to civilian government. Belaunde Terry was returned to office, succeeded by Alan Garcia Perez (1985–), who moved to alleviate continuing economic problems and to fight cocaine trafficking.

Peru–Bolivian Federation a federal state created (1836) by Gen. Santa Cruz, president of Bolivia, who declared himself its Protector (1836–9). The union was opposed by Chile, which defeated (1839) Santa Cruz in the Battle of Yungay, after which the federation was dissolved.

Pe·ter (pí:tər), St (*d.* 64 or 67), chief of the 12 Apostles, brother of St Andrew. He was originally called Simon but Jesus gave him the Aramaic name 'Kepha', meaning rock, translated into Greek as 'Petros'. A fisherman on the Sea of Galilee, he was summoned by Jesus to be a disciple. Jesus's declarations to him recorded in Matthew xvi, 18–19 are the basis of the papal claim to supremacy in succession to Peter. Peter was present at Gethsemane, but afterwards he denied three times being a follower of Jesus. He was the first of the Apostles to whom Jesus appeared after the Resurrection, and became their acknowledged leader. He was imprisoned in Jerusalem and miraculously released. Peter preached in Asia Minor, and, according to tradition, went to Rome (c. 55) and was martyred under Nero. It is generally thought that he influenced the writing of the Gospel according to St Mark. Philippine Islands the group of islands constituting the Republic of the Philippines

Philippine Sea, Battle of the a naval engagement (1944) during the 2nd world war in which a U.S. naval aviation force defeated the Japanese, paving the way for Gen. MacArthur's return to the islands

Phil·ip·pines, Republic of the (filipi:nz) a republic (area 115,708 sq. miles, pop. 54,500,000) of S.E. Asia, comprising 7,107 islands, the northernmost part of the Malay Archipelago. Capital and chief town: Manila. Principal islands: Luzon, Mindanao, Mindoro, Palawan, and the Visayas. People: Filipino (Malay), 1% Chinese, small aborigine (pygmy) and Indonesian minorities. Language: Tagalog (official), 75 other Malayo-Polynesian languages. 35% also speak English, 2% Spanish. Religion: 75% Roman Catholic, with Protestant, Moslem, independent Catholic, Animist, Buddhist and other minorities. The islands are mountainous (few peaks over 5,000 ft) and largely volcanic, with fertile valleys. The land is 44% forest, 27% cultivated. Highest point: Mt Apo (9,540 ft), on Mindanao. Except for primitive tribes, the population is concentrated on the coasts. Average summer and winter temperatures (F.): coast 82° and 77°, interior mountains 70° and 60°. Rainfall: 40–120 ins. Rainy seasons: summer and autumn in W. Luzon and W. Visayas, winter in E. Luzon, E. Visayas, and N.E. Mindanao. Typhoons are frequent north of Samar. Livestock: water buffaloes (carabao), hogs, cattle, goats, poultry, horses. Crops: rice, abaca, copra, sugarcane, corn, coconuts, tobacco, coffee, sweet potatoes, fruit (esp. pineapples), vegetables. Forestry products: lumber, gums, resins, dyes, vegetable oils, rattan. Fisheries. Mineral resources: gold, copper, chromite, silver, lead, zinc, manganese, iron ore, mercury, coal, salt, nickel, uranium. Industries: textiles, tobacco, hydroelectricity, footwear, cement, wood products, plastics, coconut oil refining, rubber goods, embroidery, hats, mats, pottery. Exports: sugar, lumber, copra, minerals and metals, abaca, coconut oil. Imports: machinery, fuels and oil, textiles, cereals, vehicles, foodstuffs. Ports: Manila, Cebu, Iloilo, Davao, Zamboanga. There are 26 universities. Monetary unit: peso (100 centavos). HISTORY Inhabited by Negritos, the islands were invaded by Indonesians (3rd millennium BC). They were visited by Japanese and Chinese traders (8th c. AD) and by Moslem Arab missionaries (14th–15th cc.). A Spanish expedition led by Magellan reached the Philippines (1521) and a Spanish settlement was founded (1565). Revolts against Spanish rule were unsuccessful until the Spanish-American War (1898), after which the Philippines were transferred to the U.S.A., which put down a Filipino rebellion (1899–1901). As trade with the U.S.A. developed, economic progress was made, and communications and education were improved. Quezon became (Sept. 1935) first president of the Philippines. The islands were occupied (1942–4) by the Japanese. The Philippines joined the U.N. (1945) and became a Republic (July 4, 1946), but continued to receive large amounts of U.S. aid to repair war damage and strengthen the economy. The Philippines joined the South East Asia Treaty Organization (1954). President Ramon Magsaysay (1953–7) ended the Communist-dominated Huk guerrilla movement. President Diosdado Macapagal (1961–5) tried unsuccessfully to confederate the Philippines with Malaya and Indonesia. President Ferdinand Marcos (1965–86) imposed martial law (1972–81) and changed the constitution (1981) to maintain his power after martial law was lifted. The assassination of the political opposition leader Benigno Aquino (1983) caused a political crisis. The opposition made substantial gains in the 1984 elections. After a court acquitted armed forces chief of staff Gen. Fabian Ver of complicity in the Aquino slaying,

criticism of Marcos and his government increased. A 1986 presidential election between Marcos and Aquino's widow, Corazon, led to widespread allegations of fraud and voter intimidation by the Marcos faction and ultimately led to Marcos's being deposed and forced to leave the country. Mrs. Aquino became president and attempted conciliation among all political groups in the country.

phi·lol·o·gist (filɔ́lədʒist) *n.* a specialist in philology.

phi·lol·o·gy (filɔ́ləd͡ʒiː) *n.* the study of language from the written texts by which it is known ‖ the study of texts and their transmission [fr. L. *philologia*, love of talk fr. Gk].

Phil·o·me·la (filəmíːlə) (*Gk mythol.*) daughter of the king of Athens. She was raped and had her tongue torn out by Tereus, king of Thrace, the husband of her sister Procne. The gods turned Philomela into a nightingale and her sister into a swallow.

phil·o·pro·gen·i·tive (filouproudʒénitiv) *adj.* (*rhet.*) tending to produce many offspring (*rhet.*) loving one's offspring [fr. Gk *philos*, loving + L. *progignere* (*progenitus*), to beget].

phi·los·o·pher (filɔ́səfər) *n.* a person who engages in the study of philosophy ‖ (*pop.*) a person who accepts misfortune with stoic calm [M.E. *philosophre* fr. O.E. fr. L. fr. Gk fr. *philos*, loving + *sophos*, wise].

philosopher's stone, philosophers' stone a mythical stone or substance much sought after by alchemists, who believed it had the power to change base metals into gold and to grant eternal youth.

phil·o·soph·ic (filəsɔ́fik) *adj.* of or relating to philosophy ‖ (*pop.*) resigned in the face of trouble, which, unemotional about what cannot be altered. **phil·o·sóph·i·cal** *adj.* [fr. L.L. *philosophicus*].

phi·los·o·phize (filɔ́səfaiz) *pres. part.* **phi·los·o·phiz·ing** *past* and *past part.* **phi·los·o·phized** *v.i.* to theorize ‖ (*pop.*) to moralize [fr. Gk *philosophos*, philosopher].

phi·los·o·phy (filɔ́səfiː) *pl.* **phi·los·o·phies** — the love or pursuit of wisdom, i.e. the search for basic principles. Traditionally, Western philosophy comprises five branches of study: metaphysics, ethics, aesthetics, epistemology, and logic ‖ systematized principles of any subject or branch of knowledge, *the philosophy of history* ‖ an attitude towards life ‖ (*pop.*) calm resignation, *he faced the situation with philosophy*.

[M.E. fr. O.F. *philosophie* fr. L. *philosophia* fr. Gk fr. *philos*, loving + *sophos*, wise, a wise man].

phil·ter, phil·tre (filtər) *n.* a potion supposed to make a person fall in love. —**magic philter** *philtre* fr. L. *philtrum* fr. Gk fr. *philein*, to love].

phi me·son (fai miːsɔn) *n.* (*particle phys.*) an unstable elementary meson particle with negative charge parity and a large mass (1019 MEV). *also* pion.

Phips, Phipps (fips) Sir William (1651–95), the first royal governor (1692–5) of Massachusetts. He appointed a commission to try those accused of witchcraft.

phle·bit·ic (flәbitik) *adj.* relating to or having phlebitis.

phle·bi·tis (flәbaitis) *n.* inflammation of the veins, usually in the legs [Mod. L. fr. Gk *phleps* (*phlebos*), vein].

phle·bol·o·gy (flebɔlәdʒiː) *n.* (*med.*) medical study of the veins.

phle·bot·o·my (flәbɔtәmiː) *pl.* **phle·bot·o·mies** *n.* (*hist.*) the act or practice of opening a vein for the purpose of bloodletting as a cure for various ailments ‖ an instance of this [O.F. *flebothomie* fr. L. *phlebotomia* fr. Gk fr. *phleps* (*phlebos*), vein + *tomos*, a cutting].

phlegm (flem) *n.* mucus, esp. when it occurs in excessive quantity in the respiratory passages ‖ (*hist.*) one of the four humors ‖ stoic self-possession, imperturbability. **phleg·mat·ic** (flegmætik) *adj.* having or showing stoic self-possession, imperturbable. **phleg·mát·i·cal** *adj.* [M.E. *fleen, fleume, fleme* fr. O.F. fr. L.L. fr. Gk *phlegma*, inflammation, phlegm].

phlo·em (flouem) *n.* a complex tissue in the vascular system of higher plants, consisting of sieve tubes and companion cells and usually also parenchyma and sclerenchyma. It serves esp. in conduction, but also in support and storage [G. fr. Gk *phloos*, bark].

phlo·gis·tic (floudʒistik) *adj.* (*med.*) of or relating to inflammations ‖ (*hist.*) of or relating to phlogiston [fr. Gk *phlogistos*, inflammable and fr. PHLOGISTON].

phlo·gis·ton (floudʒistɔn, floudʒistən) *n.* (*hist.*) a hypothetical substance formerly assumed to be present in all substances which burn, and to escape during combustion, leaving an ash (calx) behind [Mod. L. fr. Gk fr. *phlogizein*, to set on fire].

phlox (flɔks) *n.* a member of *Phlox*, fam. *Polemoniaceae*, a genus of herbaceous plants native to North America and widely cultivated, having clusters of white, pink or purple, salver-shaped flowers [L. = a kind of flower, flame, fr. Gk].

Phnom Penh (pnoumpén) the capital (pop. 70,000) and chief river port of Cambodia, on the Mekong River, an agricultural market and communications (rail and air) center. Industries: food processing, brewing, distilling, textiles, wood manufactures. Handicrafts: jewelry, goldwork.

pho·bia (foubiːə) *n.* morbid and often irrational dread of some specific thing [Mod. L. fr. Gk *phobos*, fear].

Pho·cis (óusis) a region of central Greece on the N.E. Gulf of Corinth. It formed a league of 20 city-states (7th c. BC) to guard the oracle at Delphi and was involved in a series of wars to defend it (c. 590 BC, c. 448 BC and 355–346 BC), in the last of which Phocis was conquered by Macedon.

Phoe·be (fiːbiː) (*Gk mythol.*) Artemis as goddess of the moon.

phoe·be (fiːbiː) *n.* a member of *Sayornis*, a genus of North American flycatchers, esp. *S. phoebe* [imit.].

Phoe·bus (fiːbɔs) (*Gk mythol.*) Apollo as god of the sun.

Phoe·ni·cian, Phe·ni·cian (finiʃiːən, finiʃən) *adj.* of Phoenicia, its colonies, people or language. **2.** *n.* a native of Phoenicia.

The Phoenicians, a Semitic people, settled in Phoenicia (c. 3000 BC). Centered on Byblos, Tyre and Sidon, they were at the height of their power c. 1200–c. 800 BC, trading throughout the Mediterranean. They exported cedar wood, purple dye, textiles, glass, metalwork, spices and perfumes, and founded trading stations and colonies, notably at Carthage (c. 814 BC). [illegible] the Atlantic [illegible] Britain and [illegible] Africa. The Phoenicians [illegible] to develop an alphabet. Phoenicia was conquered (6th c. BC) by Persia, and Phoenicians made an important contribution to Persian sea power and craftsmanship.

Phoe·ni·cia, Phe·ni·cia (finiʃiːə, finiʃə) an ancient country now forming the coastal region of Lebanon and part of Syria.

Phoe·nix (fiːniks) the capital (pop. 764,911) and largest city of Arizona, center of an irrigated agricultural district; electrical and electronic engineering, farm machinery, aircraft, food processing, metallurgy, tourism.

phoe·nix, phe·nix (fiːniks) *n.* (*Egypt. mythol.*) a bird of gorgeous plumage, sacred to the sun, reborn from the ashes of the funeral pyre which it made for itself when each life span of 500 or 600 years was over ‖ something or someone seen as resembling this bird, esp. with respect to its power of self-regeneration [O.E. and O.F. *fenix* fr. M.L. *phenix*, and L. *phoenix* fr. Gk *phoinix*].

Phoenix Islands eight coral islands (area 11 sq. miles, pop. 1,200), of which Canton and Enderbury have been jointly controlled by the U.S.A. and Great Britain since 1939, the rest being part of Kiribati.

phon (fɔn) *n.* (*phys.*) a unit of loudness, equivalent to a sound intensity of 1 decibel [fr. Gk *phōnē*, sound, voice].

pho·nate (founeit) *pres. part* **pho·nat·ing** *past* and *past part.* **pho·nat·ed** *v.i.* (*physiol.*) to produce a vocal sound. **pho·na·tion** *n.* [fr. Gk *phōnē*, voice].

phone (foun) **1.** *n.* a telephone. **2.** *v.i.* and *t. pres. part.* **phon·ing** *past* and *past part.* **phoned** to telephone [TELEPHONE].

phone *n.* (*phon.*) a simple speech sound [fr. Gk *phōnē*, voice].

phone-in (fóunin) *n.* a broadcast program inviting audience telephone participation with questions or comments.

pho·neme (fóuniːm) *n.* a class of closely related speech sounds in a given language considered as forming a unit. **pho·né·mic** *adj.* **pho·né·mi·cal·ly** *adv.* **pho·né·mics** *n.* the branch of linguistics dealing with the phonemes of a particular language [fr. F. *phoneme* fr. Gk].

pho·net·ic (fənétik, founetik) *adj.* of or relating to vocal sounds and speech ‖ consistently representing sounds by the same symbols, *phonetic spelling* ‖ relating to phonetics. **pho·nét·i·cal·ly** *adv.* **pho·ne·ti·cian** (founitiʃən) *n.* a specialist in phonetics. **pho·net·i·cist** *n.* a phonetist. **pho·nét·ics** *n.* the branch of language study concerned with the production of speech sounds, alone or in combination, and their representation in writing ‖ the phonetic system of a given language [fr. Mod. L. *phoneticus* fr. Gk *phōnētikos* fr. *phōnein*, to utter sound].

pho·ne·tist (founitist) *n.* a phonetician ‖ someone who advocates phonetic spelling [fr. Gk *phōnētos*, to be spoken].

phoney *PHONY.

phon·ic (fɔnik, founik) *adj.* of or relating to sound, esp. speech sounds [fr. Gk *phōnē*, voice].

phon·ics (fóniks) *n.* the use of sound-symbol (phoneme-grapheme) relationships in the teaching of reading.

pho·no·ar·gi·o·gra·phy (founouaːrdʒiɔgrəfiː) *n.* (*med.*) analysis of blood flow by sound.

pho·no·car·di·o·gra·phy (founoukaːrdiɔgrəfiː) *n.* (*med.*) the recording of heart sounds. **pho·no·car·di·o·gram** *n.* the record. —**pho·no·car·di·o·graph** *n.* the instrument used.

pho·no·gram (fóunəgræm) *n.* a symbol representing a spoken word, sound or syllable, e.g. in shorthand [fr. Gk *phōnē*, sound, voice + *gramma*, letter, writing].

pho·no·graph (fóunəgræf, fóunəgrɑf) *n.* (*Am. Br.* Gramophone) a machine for reproducing sounds recorded on a disk or cylinder. **pho·no·graph·ic** (founəgræfik) *adj.* **pho·no·graph·i·cal·ly** *adv.* [fr. Gk *phōnē*, sound + *-graphos*, written].

pho·nog·ra·phy (founɔgrəfiː) *n.* phonetic spelling or writing ‖ a phonetic shorthand system [fr. Gk *phōnē*, sound + *graphia*, writing].

pho·no·lite (fóunlait) *n.* a gray or green volcanic rock giving a ringing sound when struck. **pho·no·lit·ic** (founlitik) *adj.* [fr. Gk *phōnē*, sound + *lithos*, stone].

pho·no·log·ic (founlɔdʒik) *adj.* relating to or according to the principles of phonology. **pho·no·log·i·cal** *adj.*

pho·nol·o·gist (founɔlədʒist, fənɔlədʒist) *n.* a specialist in phonology.

pho·nol·o·gy (founɔlədʒiː, fənɔlədʒiː) *n.* the study of speech sounds, esp. of the theory and

development of sound changes within a given language ‖ the system of phonetics of a language ‖ the study of phonetics or of phonemics

pho·nons (founɔns) *n.* (*phys.*) a quantum of heat energy in the acoustic vibration of a crystal lattice

pho·no·pho·tog·ra·phy (founoʃətɔgrəfi) *n.* photographic recording of vibrations created by speech. *Cf* VOICEPRINT

pho·nop·si·a (founɔpsi:ə) *n.* (*physiol.*) the visual perceptions of color resulting from sound

pho·no·tac·tics (founoutæktiks) *n.* (*linguistics*) analysis of sound structure and function in language — **pho·no·tac·tic** *adj.*

pho·ny, pho·ney (founi) *comp.* **pho·ni·er** *superl.* **pho·ni·est** **1.** *adj.* (*pop.*) not genuine, coun-

pho·ny mine (founi) (*mil.*) an object of any available material, used to simulate a mine in a

phony minefield (*mil.*) an area of ground used to simulate a minefield with the object of deceiving the enemy

phorate — biodegradable insecticide used esp. to protect

phos·gene (fɔzdʒi:n) *n.* carbonyl chloride, $COCl_2$, a colorless, poisonous gas with a smell like musty hay, used in the dyestuff industry and in chemical warfare in the 1st world war

$Pb_3(CO_3)_2(OH)_2$, consisting of lead chloride and lead carbonate, occurring as tetragonal crystals [fr.

phos·phe·don — don) *n.* (*chem.*) organophosphorus insecticide

phos·pha·tase (fɔsfəteis) *n.* any of many enzymes in body tissues, which break down compounds of carbohydrates and phosphates [PHOS

phos·phate (fɔsfeit) *n.* any salt or ester of phosphoric acid (*pl.*) any of several substances containing these (e.g. phosphate of calcium), used as fertilizer to supply phosphorus **phos·phat·ic** (fɔsfætik) *adj.* of or containing phosphates or phosphoric acid **phos·pha·tide** (fɔsfətaid) *n.* (*biochem.*) one of a class of complex esters of phosphoric acid and an alcohol containing more than one hydroxyl group (e.g. glycerol) and containing usually fatty acids and a nitrogen base. They are found in all living

pres. part. **phos·pha·tiz·ing** *past* and *past part.* **phos·pha·tized** *v.t.* to treat with a phosphate or phosphates, to change into a phosphate [F.]

— as a result of mechanical stimulation of the retina in the absence (usually) of light, e.g. when pressure is put on the eyeball with the eyelid shut [fr. Gk *phos*, light + *phainein*, to show]

phos·phide (fɔsfaid, fɔsfid) *n.* (*chem.*) a binary other element or a radical [PHOSPHORUS]

phos·phine (fɔsfi:n, fɔsfin) *n.* a colorless, poisonous gas, PH_3, with a smell like garlic, a basic orange dye [PHOSPHORUS]

phos·phite (fɔsfait) *n.* any salt or ester of phos-

— reactive *biochem.* high-energy phosphate that releases energy for muscular activity

phos·pho·fruc·to·ki·nase (fɔsfoufrʌktoukineis) *n.* (*biochem.*) an enzyme that catalyzes conver

activated with a metallic impurity (e.g. copper, silver, lead). Phosphors are used for luminescent coatings in cathode-ray tubes, fluorescent lamps, luminous dials etc. [fr. L. *phosphorus*, phosphorus]

phosphor bronze a very hard, tough bronze containing a small amount of phosphorus. It is used in bearings, ships' propellers etc.

phos·pho·resce (fɔsfərés) *pres. part.* **phos·pho·resc·ing** *past* and *past part.* **phos·pho·resced** *v.i.* to exhibit phosphorescence [PHOS-

phos·pho·res·cence (fɔsfərés'ns) *n.* a luminescence characterized by a temperature-dependent time rate of decay after the stimulation has been removed (cf. FLUORESCENCE), e.g. in many forms of bioluminescence [PHOSPHO-

phos·pho·res·cent (fɔsfərés'nt) *adj.* exhibiting phosphorescence [PHOSPHORUS]

phosphorated, phosphoreted (fɔsfəreitid) *adj.* combined with phosphorus

phos·phor·ic (fɔsfɔrik, fɔsfɔ'rik) *adj.* pertaining to phosphorus, esp. in compounds where this has a high valence [fr. F. *phosphorique*]

phosphoric acid a colorless, crystalline bitter acid, H_3PO_4, used in the manufacture of fertilizers, in sugar refining etc.

phos·pho·rism (fɔsfərizəm) *n.* phosphorus poi-

phos·pho·rous (fɔsfərəs) *adj.* pertaining to phosphorus, esp. in compounds where this has a low valence [fr. F. *phosphoreux*]

phosphorous acid a crystalline acid, H_3PO_3, which absorbs oxygen easily, used as a reducing agent

phos·pho·rus (fɔsfərəs) *pl.* **phos·pho·ri** (fɔsfərai) *n.* a nonmetallic element (symbol P, at. no. 15, at. mass 30.9738) which can exist in several allotropic forms. White or yellow phosphorus is an unstable, poisonous, waxy substance which is highly inflammable, oxidizing with a faint glow in air at room temperature. Red phosphorus is a stable, less inflammable, nonpoisonous powder obtained by heating white phosphorus. Organic compounds of phosphorus are present in all living cells. Inorganic compounds are important constituents of minerals, soil, bones and teeth, and are used in the manufacture of matches [L. fr. Gk *phosphoros* — light-bearing]

phosphureted, phosphurted — *adj.* phosphoreted [fr. obs. *phosphuret*, phosphide fr. Mod. L. *phosphoretum*]

phot (fot, fout) *n.* a unit of illumination, being the illumination when 1 lumen is incident on 1 square centimeter of a surface [fr. Gk *phōs*

pho·tic zone (foutik) (*envir.*) the region of aquatic environment in which the intensity of natural light is sufficient for photosynthesis

Pho·ti·us (fou[ɪ]əs) (c. 820–c. 891), patriarch of Constantinople. A partisan of the Iconoclasts, he replaced St Ignatius as patriarch (858–67), but was not recognized by the papacy. He was again patriarch (877–86)

photo- (foutou) *prefix* having to do with light ‖ having to do with photography or photographs [fr. Gk *phos* (*photos*), light]

pho·to *pl.* **pho·tos** *n.* a photograph, esp. a snapshot

— self-nourishing organism that utilizes light as an energy source, e.g., blue-green algae

pho·to·bi·ol·o·gy (foutoubaiɔlədʒi) *n.* study of effect of light on life — **pho·to·bi·ot·ic** *adj.*

pho·to·bot·a·ny (foutoubɔtəni) *n.* branch of botany that deals with effect of light on plants

pho·to·cell (foutousel) *n.* a photoelectric cell

pho·to·chem·i·cal (foutoukemik'l) *adj.* of or relating to photochemistry ‖ of or relating to the action of light on chemical properties or reactions

— electromagnetic radiation (esp. in the visible region of the spectrum) on chemical reactivity (e.g. in photography or photosynthesis)

pho·to·chro·mat·ic (foutoukroumætik) *adj.* **1.** of color photography **2.** of colored light

pho·to·chrom·ism (foutoukroumizəm) *n.* property of changing color under light or lack of

— kromagraf) *n.* a camera taking exposures at timed intervals, used to record biological

changes etc. ‖ a photograph taken by such a camera ‖ (*astron.*) a camera attached to a telescope and used to photograph a heavenly body at timed intervals ‖ (*phys.*) a device for recording small intervals of time

pho·to·co·ag·u·la·tion (foutoucouægju:leiʃən) *n.* (*med.*) technique of causing tissue to coagulate under intense controlled light, e.g., in ophthalmological surgery. —**pho·to·co·ag·u·la·tive** *adj.* **pho·to·co·ag·u·la·tor** *n.* the instrument

pho·to·con·duc·tive (foutoukəndʌktiv) *adj.* of, relating to or having the property of photoconductivity

pho·to·con·duc·tiv·i·ty (foutoukɒndʌktiviti:) *n.* the property of certain substances (e.g. selenium) of having an electrical conductivity that depends upon the nature and intensity of the electromagnetic radiation impinging upon them — PHOTOELECTRIC CELL

photoconductivity cell a type of photoelectric cell

pho·to·cop·i·er (foutoukɒpi:ər) *n.* a machine for making photocopies

pho·to·cop·y (foutoukɒpi:) **1.** *pl.* **pho·to·cop·ies** *n.* a photographic reproduction of a document, illustration, etc. **2.** *v.t. pres. part.* **pho·to·cop·y·ing** *past* and *past part.* **pho·to·cop·ied** to make a photocopy of

pho·to·cube (foutoukju:be) *n.* a plastic cube that holds a photograph to inside surface for display

pho·to·cur·rent (foutoukə:rənt, foutoukʌrənt) *n.* a photoelectric current, i.e. one produced by the action of electromagnetic radiation in a photoelectric effect

pho·to·de·tect·or (foutouditektər) *n.* (*electr.*) device sensitive to light, e.g., photodiodes, phototransistors, photoswitches. *also* photosensor

pho·to·do·sim·e·try (foutoudousimetri:) *n.* the measurement of total radiation exposure through exposure of a photographic film

pho·to·dy·nam·ic (foutoudainæmik) *adj.* of or relating to the toxic effect of light, esp. sunlight, on living organisms

pho·to·e·las·tic (foutouilæstik) *adj.* relating to or having the property of photoelasticity

pho·to·e·las·tic·i·ty (foutouilæstisiti:) *n.* the property in certain transparent isotropic solids of becoming birefringent when submitted to stress

—Stresses in engineering components may be investigated by modeling them in glass or a transparent plastic and examining the stressed model by polarized light. The stressed regions in the model rotate the plane of polarization of the light and produce a visible pattern from which the direction and size of the stresses may be deduced

pho·to·e·lec·tric (foutouilektrik) *adj.* of any of the factors involved in the effect of electromagnetic radiation on the electrical behavior of matter

photoelectric cell one of three types of device utilizing a photoelectric effect: (a) a photoconductivity cell, consisting essentially of a photoconductive substance in a current-measuring circuit. It is used most often to measure the intensity or quantity of illumination falling on it. A change in conductivity caused by incident light results in a change in the current carried by the circuit, which is registered by an ammeter (cf. EXPOSURE METER) (b) a phototube, consisting of an evacuated glass bulb containing a photoemissive cathode and an anode held at a positive potential, which attracts the photoelectron produced in the cathode by incident light. The current so produced may be used to actuate — (cf. ELECTRIC EYE, PHOTOMULTIPLIER) (c) a photovoltaic cell, used to convert electromagnetic radiation to an electric current, e.g. in a solar battery

photoelectric effect any of several phenomena caused by the interaction of electromagnetic radiation with (usually metallic) substances — (cf. QUANTUM THEORY, PHO-

pho·to·e·lec·tric·i·ty (foutouilektrisiti:, foutouilektrisiti:) *n.* electricity produced by the action of electromagnetic radiation ‖ a branch of physics that deals with the physical effects of the interaction of light and matter

pho·to·e·lec·tron (foutouilektrɒn) *n.* an electron released by photoemission

pho·to·e·mis·sion (foutouimiʃən) *n.* the process in which electromagnetic radiation incident

upon a substance (usually a metal) causes the release of electrons. The process occurs only when the frequency of the radiation is greater than a threshold value characteristic of the substance. The kinetic energy of the photoelectron is independent of the intensity of radiation, depending only on its frequency

pho·to·e·mis·sive (foutoumɪsɪv) *adj.* emitting electrons when exposed to radiation of certain wavelengths, or capable of doing so

pho·to·en·grave (foutoungreɪv) *pres. part* **pho·to·en·grav·ing** *past* and *past part* **pho·to·en·graved** *v.t.* to make a photoengraving of

pho·to·en·grav·er *n.* [backformation fr PHOTOENGRAVING]

pho·to·en·grav·ing (foutoungreɪvɪŋ) *n.* (*printing*) a process by which a printing block is made from a photograph: the photograph is photographed onto metal and the parts not to be printed are then mechanically etched away (cf. PHOTOGRAVURE) ‖ a print taken from such a block

pho·to·es·say (foutoueseɪ) *n.* a study of a subject presented principally through photographs

pho·to·fab·ri·ca·tion (foutoufæbrɪkeɪʃən) *n.* (*electr.*) **1.** use of photographic process creating integrated circuits on silicon wafers. **2.** (*computer*) manufacture of miniaturized semiconductor circuits by photographic reduction before chemical etching

photo finish the finish of a race so close that a photograph at the finish line is required to identify the winner ‖ the end of any very close contest

pho·to·fis·sion (foutoufɪʃən) *n.* (*nuclear phys.*) photo-induced nuclear fission

pho·to·flash bomb (foutoufla) (*mil*) bomb designed to produce a brief and intense illumination for medium-altitude night photography

pho·to·flood (foutoufləd) *n.* (*photog.*) an electric lamp to which excess voltage is supplied so that it emits especially bright light

pho·to·gen·ic (foutədʒenɪk) *adj.* photographing to advantage ‖ causing or producing light [fr PHOTO- + Gk *genēs*, born, produced]

pho·to·gram·me·try (foutəgræmɪtrɪ) *n.* the art or process of making a survey or a map with the help of photographs taken esp. from the air [fr *photogram*, var. of PHOTOGRAPH + Gk *metria*, a measuring]

pho·to·graph (foutəgræf, foutəgrʊf) **1.** *n.* a reproduction, usually on photographic paper, made by photography **2.** *v.t.* to take a picture of by photography ‖ *v.i.* to practice photography ‖ to appear (in a specified way) in a photograph, *she photographs badly* **pho·tog·ra·pher** (fətɔgrəfər) *n.* a person who practices photography, esp. as a profession [fr. PHOTO- + Gk *graphos*, written]

pho·to·graph·ic (foutəgræfɪk) *adj.* pertaining to photography ‖ resembling the process of photography, *a photographic memory* **pho·to·graph·i·cal·ly** *adv.*

photographic paper a piece of paper that has been coated with an emulsion containing silver salts. When exposed to the light passed through a negative and developed (cf. PHOTOGRAPHY) it gives a (positive) photograph (cf. FILM)

pho·tog·ra·phy (fətɔgrəfɪ:) *n.* the art, process or occupation of producing photographs [fr. Gk *phōs* (*phōtos*), light + *graphia*, writing]

—A photographic film is exposed to an image formed by the optical system of a camera, producing a latent image on the film. This image consists of regions exposed to variable quantities of light which render an amount of silver salts susceptible to reduction according to the degree to which they were exposed. Development of the film consists of chemical reduction of the exposed portions without affecting the unexposed ones. By means of the reduction, black, colloidal particles of metallic silver are deposited with a density corresponding to the amount of incident light. The film is then fixed, i.e. all unaffected silver salts are removed by chemical extraction. (To this point in the process all steps are carried out in the absence of light. Fixing is accomplished by immersing the film in hypo, which forms a water-soluble complex with silver salts, and the film is then washed with water. Finally the film is dried, giving a negative. A photograph may be produced at any time from the negative by allowing light that has passed through the negative to fall upon a piece of photographic paper which is then treated in the same way as the negative was, giving a photograph or print.

Color photography depends upon a method of [illegible] the incident [illegible] in the [illegible] of the spectrum is used. The reduction, during development, of the [illegible] to that range, subsequent transmission through the negative being [illegible] and [illegible] the correct [illegible] color [illegible]

pho·to·gra·vure (foutəgrəvjʊər) *n.* the process of printing from an etched copper plate (cf. PHOTOENGRAVING). A paper coated with [illegible] that in the etched recesses, and these print in a tone related to their depth: a print made by this [illegible]

pho·to·ki·ne·sis (foutoukɪnɪ:sɪs) *n.* movement in response to light **pho·to·ki·net·ic** (foutoukɪnetɪk, foutoukɪnetɪk) *adj.*

pho·to·lith (foutəlɪθ) *n.* **photolithos** [illegible] a photolithograph **2.** *v.t.* to photolithograph

pho·to·lith·o·graph (foutəlɪθəgræf, foutəlɪθəgrʊf) **1.** *v.t.* to print by photolithography **2.** *n.* a print made by photolithography [PHOTOLITHOGRAPH]

pho·to·lith·o·graph·ic (foutəlɪθəgræfɪk) *adj.* of or produced by photolithography [PHOTOLITHOGRAPH]

pho·to·lith·o·graph·y (foutəlɪθɔgrəfɪ:) *n.* a process of printing from a plate coated with a photographic film which has been exposed in a camera, developed, and made receptive to ink

pho·tol·y·sis (foutɔlɪsɪs) *n.* chemical decomposition effected by electromagnetic radiation [Mod. L. fr Gk *phos* (*photos*), light + *lusis*, a loosening]

pho·to·map (foutoumæp) *n.* mosaic of aerial photographs with identification markings

pho·to·me·chan·i·cal (foutoumɪkænɪkəl) *adj.* of any mechanical printing process using a plate prepared photographically **pho·to·me·chan·i·cal·ly** *adv.*

pho·tom·e·ter (foutɔmɪtər) *n.* (*phys.*) an instrument used to measure illuminating power by comparing two sources of light **pho·to·met·ric** (foutəmetrɪk) *adj.* **pho·tom·e·try** (foutɔmɪtrɪ) *n.* (*phys.*) the comparison of illuminating powers, esp. of one source of light with a standard source ‖ the science which deals with this [fr Gk *phos* (*photos*), light + *metria*, measuring]

pho·to·mi·cro·graph (foutoumaɪkrəgræf, foutoumaɪkrəgrʊf) *n.* a photograph made by photomicrography **pho·to·mi·crog·ra·phy** (foutoumaɪkrɔgrəfɪ:) *n.* the process of making photographs of the enlarged images, formed by a microscope, of very small objects [fr. PHOTO- + MICRO- + Gk *graphos*, written]

pho·to·mi·cros·co·py (foutoumaɪkrɔskəpɪ:) *n.* photomicrography

pho·to·mul·ti·pli·er (foutoumʌltɪplaɪər) *n.* an electron multiplier having a photoelectric emission as its first stage

pho·ton (foutɔn) *n.* (*phys.*) a fundamental particle of rest mass 0 that is regarded as the quantum of radiant energy. The photon has spin quantum number 1 (*ELECTROMAGNETIC WAVE) [fr. Gk *phōs* (*phōtos*), light]

pho·to·off·set (foutoufsɛt, foutoufsɪt) *n.* (*printing*) a process whereby a photolithographic plate transmits an image to a roller which transfers the impression to paper

pho·to·pe·ri·od (foutəpɪərɪəd) *n.* (*biol.*) the relative duration of periods of light and dark as these affect the growth or behavior of plants and animals (e.g. budding or bird migration) **pho·to·pe·ri·od·ic** (foutəpɪərɪɔdɪk) *adj.* **pho·to·pe·ri·od·i·cal·ly** *adv.* **pho·to·pe·ri·od·ism** (foutəpɪərɪɔdɪzəm) *n.* (*biol.*) the response of an organism to the photoperiod

pho·to·phile (foutəfaɪl) *adj.* photophilic

pho·to·phil·ic (foutəfɪlɪk) *adj.* (*biol.*) flourishing in strong light **photophilous** [illegible] **pho·toph·i·ly** *n.* the quality or state of being photophilic [PHOTO- + Gk *philos*, loving]

photophobia [illegible] abnormal dislike of or sensitivity to strong light [Mod. L. fr Gk *phos* (*photos*), light + *phobia*, [illegible]

photopigment [illegible] coloring material that changes under light

pho·to·po·la·rim·e·ter (foutoupoulərɪmɪtər) *n.* (*astron.*) device for examining features of planets utilizing telescopy, photography and polarized light

pho·to·pol·y·mer (foutoupɔlɪmər) *n.* (*chem.*) a photosensitive plastic

pho·to·print (foutəprɪnt) *n.* (*printing*) a reproduction [illegible]

photoreal·ism [illegible] **photorealist** [illegible]

pho·to·re·sist (foutoʊrɪzɪst) *n.* [illegible] that offers under light, used as coating on integrated circuits

pho·to·scan (foutoʊskæn) *n.* a photographic record of radioactivity in various parts of a body. **pho·to·scan** *v.* **pho·to·scan·ner** *n.* the X-ray camera

pho·to·sen·si·tive (foutoʊsɛnsɪtɪv) *adj.* affected by the incidence of radiant energy, esp. light **pho·to·sen·si·tiv·i·ty** *n.*

photosensor [illegible]

pho·to·sphere (foutəsfɪər) *n.* (*astron.*) the surface layer of the sun, consisting of a layer of gases of extremely low density at a very low [illegible] which heat-transfer processes produce many convective cells. They give this layer a granular appearance when photographed through a telescope (*CHROMOSPHERE, *CORONA) [fr PHOTO- + Gk *phaira*, sphere]

pho·to·stage (foutoustɛɪdʒ) (*botany*) life stage of a seedling during which light is essential

pho·to·stat (foutəstæt) **1.** *n.* a machine used to make photographs of documents etc. to any desired scale: a photograph thus made **2.** *v.t. pres. part* **pho·to·stat·ing**, *past* and *past part* **pho·to·stat·ed**, esp. *Br* **pho·to·stat·ted** to make a photostatic copy of **pho·to·stat·ic** (foutəstætɪk) *adj.* (*Photostat* a trademark)

pho·to·syn·the·sis (foutəsɪnθɪsɪs) *n.* the synthesis of chemical substances with the aid of light, esp. the formation of carbohydrates (e.g. in green plants) from carbon dioxide and water with the liberation of oxygen in the presence of chlorophyll

pho·to·tax·is (foutətæksɪs) *n.* (*pl.*) **pho·to·tax·es** (foutətæksɪ:z) *n.* a taxis in response to light **pho·tax·y** *pl* **pho·tax·ies** *n.* a phototaxis

pho·to·tel·e·graph (foutoutelɪgræf, foutoutelɪgrʊf) *n.* a picture or signal which has been transmitted by phototelegraphy **pho·to·tel·e·graph·ic** (foutoutelɪgræfɪk) *adj.*

pho·to·te·leg·ra·phy (foutoutɪlegrəfɪ:) *n.* the transmission of photographs by telegraphy ‖ transmission of signals by light, e.g. by a heliograph

pho·tot·o·nus (foutɔtənəs) *n.* a tonic condition (e.g. in phototropic plants) induced by the proper light conditions [Mod. L, fr. Gk *phōs* (*photos*), light + *tonos*, tone, tension]

pho·to·tran·sis·tor (foutoutrænzɪstər) *n.* (*electr.*) semiconductor with three electrodes that induce and amplify a current induced by light

pho·to·troph (foutoutroʊf) *n.* an organism that uses light to turn carbon dioxide into oxygen and carbon dioxide

pho·to·troph·ic (foutətrɔfɪk) *adj.* able to use carbon dioxide, in the presence of light, for metabolism (*PHOTOSYNTHESIS) [fr PHOTO- + Gk *trophē*, food]

pho·to·trop·ic (foutətrɔpɪk) *adj.* of, by, or capable of undergoing phototropism [fr PHOTO- + Gk *tropos*, turning]

pho·tot·ro·pism (fətɔtrəpɪzəm) *n.* a tropism in which light acts as a stimulus ‖ the reversible color change exhibited by certain substances when exposed to radiant energy

pho·to·tube (foutətʊb, foutətjʊb) *n.* a type of photoelectric cell

pho·to·ty·pog·raph·ic (foutoutaɪpəgræfɪk) *adj.* referring to or done by phototypography **pho·to·ty·po·graph·i·cal** *adj.*

pho·to·ty·pog·ra·phy (foutoutaɪpɔgrəfɪ:) *n.* a printing process using photomechanical means at the composing stage as well as later

pho·to·vol·tage (foutouvoultɪdʒ) *n.* the electromotive force developed in a conducting circuit when the boundary between certain dissimilar substances within the circuit is bathed in electromagnetic radiation ‖ any voltage produced in a photosensitive substance by electromagnetic radiation

pho·to·vol·ta·ic (foutouvɔltɛɪk) *adj.* photoelectric, *a photovoltaic cell*

phras·al (freɪzəl) *adj.* of or consisting of a phrase or phrases

phrase (freɪz) **1.** *n.* a sequence of words expressing a single idea, esp. (*gram.*) a group of words without a subject and predicate, functioning together within a sentence ‖ an expression that is pithy or idiomatic ‖ (*mus.*) a small group of notes forming a unit of melody, often forming half of a period ‖ (*dance*) a sequence of movements forming a choreographic pattern **2.** *v.t. pres. part* **phras·ing** *past* and *past part* **phrased** to express in words, *this passage is badly phrased* ‖ (*mus.*) to divide or mark off into

phrases, esp. in performance [fr. L.L. *phrasis*, diction fr. Gk fr. *phrazein*, to point out, tell]

phrase marker (freiz) (*linguistics*) a signal of the end of a phrase

phra·se·o·gram (freiziəgræm) *n.* a single written character representing a whole phrase, esp. in shorthand [fr. Gk *phrasis*, diction + *gramma*, letter, writing]

phra·se·o·graph (freiziəgræf, freiziəgrɑf) *n.* a phrase for which a phraseogram is used [fr. Gk *phrasis*, diction + *graphos*, written]

phra·se·o·log·i·cal (freiziəlɔdʒikˈl) *adj.* of, re-

phra·se·ol·o·gy (freiziˈɔlədʒi) *n.* manner of using and arranging words [fr. Mod. L. *phraseologia* fr. Gk fr. *phrasis*, diction + *logos*, word]

phras·ing (freiziŋ) *n.* mode of expressing in words; *the phrasing of a request* | (*mus.*) musical phrases with respect to composition or performance

phra·try (freitri) *pl.* **phra·tries** *n.* (*Gk hist.*) a subdivision of a phyle in the Athenian state | a tribal or clan subdivision in primitive society [fr. Gk *phratria* fr. *phratēr*, member of the same

phy·tane ($C_{20}H_{42}$) (fáitein) *n.* (*chem.*) hydrocarbon resulting from breakdown of chlorophyll, found as constituent of fossils 3 billion yrs. old

phy·to·gen·e·sis (faitədʒénisis) *n.* the origin, evolution or development of plants **phy·to·ge·net·ic** (faitədʒinétik) *adj.* [fr. Gk *phuton*, plant + GENESIS]

phy·to·gen·ic (faitədʒénik) *adj.* of or derived from plants [fr. Gk *phuton*, plant + *genēs*, born, produced]

phy·tog·e·ny (faitɔdʒini:) *n.* phytogenesis

phy·to·ge·og·ra·phy (faitoudʒi:ɔgrəfi:) *n.* the study of the geographical distribution of plants [fr. Gk *phuton*, plant + GEOGRAPHY]

phy·tog·ra·phy (faitɔgrəfi:) *n.* the description and (sometimes) systematic classification of plants [fr. Mod. L. *phytographia* fr. Gk *phuton*, plant + *graphia*, writing]

phy·to·pa·thol·o·gy (faitoupəθɔlədʒi:) *n.* the study of plant diseases, esp. parasitic diseases [fr. Gk *phuton*, plant + PATHOLOGY]

phy·toph·a·gous (faitɔfəgəs) *adj.* (esp. of insects) feeding on plants [fr. Gk *phuton*, plant + *phagos*, eating]

phy·tos·ter·ol (faitɔstərɔl) *n.* any of several sterols derived from plants, e.g. ergosterol [fr. Gk *phuton*, plant + STEROL]

phy·to·tron (fáitoutron) *n.* (*botany*) an apparatus or laboratory for growing plants under controlled conditions

pi (pai) *n.* the sixteenth letter (Π, π = p) of the Greek alphabet | the symbol (π) used to denote the ratio of the circumference of a circle to the diameter. π = 3.14159 this ratio

pi, pie **1.** *n.* (*printing*) type metal jumbled together instead of being sorted into the case **2.** *v. pres. part.* **pi·ing, pie·ing** *past* and *past part.* **pied** *v.t.* (*printing*) to jumble up (type) ‖ *v.i.* (*printing*, of type) to become jumbled [perh. fr. PIE, baked dish]

pi·ac·u·lar (paiækjulər) *adj.* (of a fault) requiring atonement; expiatory [fr. L. *piacularis*, expiatory fr. *piaculum*, atonement]

piaffe (pjæf) **1.** *v.i. pres. part.* **piaff·ing** *past* and *past part.* **piaffed** (*manège*, of a horse) to perform a slow trot without advancing or retreating **2.** *n.* the movement so executed **piaff·er** *n.* a piaffe [F. *piaffer*]

Piaget (pjɑzeɪ), Jean (1896–1980) Swiss psychologist, the most influential theorist in the history of developmental psychology and the study of human development. He wrote more than fifty books as well as articles and lectures on psychology, epistemology, philosophy, logic, biology, sociology and pedagogy.

pi·a ma·ter (paɪəmeɪtər) *n.* the highly vascular, delicate, innermost membrane of three which surround the brain and spinal cord (*MENINGES) [M.L. = tender mother]

pi·a·nis·si·mo (pi:ənɪsəmou, pjɑnɪ'sɪ:mɔ) (*mus., abbr.* pp.) **1.** *adj.* very soft **2.** *adv.* very softly **3.** *pl.* **pi·a·nis·si·mos** *n.* a pianissimo passage [Ital. superl. of *piano* = soft, softly]

pi·an·ist (pɪænɪst, pjænɪst, pi:ənɪst) *n.* a person who plays the piano, esp. professionally **pi·a·nis·tic** (pi:ənɪstɪk) *adj.* relating to or suitable for performance on the piano **pi·a·nis·ti·cal·ly** *adv.* [fr. F. *pianiste*]

pi·a·no (pi:ænou) (*abbr. p.*) **1.** *adv.* (*mus.*) softly **2.** *adj.* (*mus.*) soft **3.** *pl* **pi·a·ni** (pi:ɑni:), **pi·a·nos** *n.* (*mus.*) a passage rendered softly [Ital.]

pi·an·o (pjænou, pjɑnou) *pl.* **pi·an·os** *n.* a musical stringed percussion instrument before which the player sits (as if at a table), playing on a horizontal keyboard. This usually has 88 keys, with corresponding wires (tuned by equal temperament) which are stretched over a sounding board inside the instrument. When a key is pressed down, the corresponding wires (usually 3 per key) are struck by a felt-covered wooden hammer to produce the note, which may be dampened or sustained by pedals. The keyboard consists of flat, white keys which correspond to the C major scale, with shorter, thinner, raised black ones which sound the other notes of the chromatic scale (*GRAND PIANO, *UPRIGHT PIANO) [Ital., shortened fr. *pianoforte*]

pi·an·o·for·te (pi:ænoufɔrtɪ, pi:ænoufɔrtei) *n.* a piano [Ital. fr. *piano*, soft + *forte*, loud (from its capacity for producing wide variations in volume)]

pi·a·no·la (pi:ənóulə) *n.* a player piano ‖ a mechanical attachment operating this [fr. *Pianola*, a trademark]

pi·as·sa·ba, pi·a·sa·ba (pi:əsúbə) *n.* piassava

pi·as·sa·va, pi·a·sa·va (pi:əsúvə) *n.* either of two South American palms, *Attalea funefera* and *Leopoldinia piassaba*, which yield a woody brown fiber ‖ the fiber of either of these, used in the manufacture of brooms, brushes etc. [Port *piassaba* fr. Tupi]

pi·as·ter, pi·as·tre (pɪæstər) *n.* a monetary unit of varying value used in many countries, e.g. Turkey, Egypt, Lebanon, Libya, the Sudan ‖ a coin of the value of any of these [F *piastre* fr Ital.]

Pia·ve (pjáve) a river in N.E. Italy, flowing 137 miles from the E. Alps to the Adriatic above Venice

pi·az·za (pi:ǽzə, pi:úzə, pi:ǽtsə, pi:útsə) *n.* an open square in a town, closely surrounded by buildings, esp. in Italy ‖ (*archit.*) a portico or covered walk supported by arches ‖ a veranda [Ital.]

Pi·cas·so (pikɑsou, pi:kɑsɔ) (Pablo Ruiz y Picasso, 1881–1973), Spanish painter, sculptor and ceramicist. He migrated to Paris just as the time when the gains of the Postimpressionists in rendering space and solid form were being consolidated. The blue period (1901–4) and rose period (1905–6), in which these colors dominate his work, preceded the analytical and geometrical investigation (1908–14) with Braque leading to the development of cubism. 'Les demoiselles d'Avignon' (1907) is one of his first major works in this style. Cubist works of the period also belong experiment with collage and picture which bear the influence of the 'simplifications' of Negro art. His period of 'classicism' (1920–6) was characterized by monumental human figures, and full-on or profile treatment of races and bodies. He then turned to surrealism and abstraction (1926–36). His 'Guernica' (1937) is a powerful symbolic illustration of the horrors of war. Throughout his career Picasso moved from style to style with ease, or from painting to etching, sculpture, pottery, theater decor for ballet or poster design. From all this activity some themes stand out: the gypsies, acrobats and absinthe-drinkers of the melancholy blue period, the sober abstractions of the early cubist paintings (guitars, fruit, household objects, but also pierrots), the newspaper and wood-grain of the collages, and from the later periods the obsessive bulls, goats and shepherds of Mediterranean life, the minotaurs of Mediterranean mythology, the succession of women companions lovingly analyzed and re-created, the images of grief and violence from 1937–45, his children, the gay variations, in rather flat bright hard colors, of later years, and at all times a celebration of the natural creation

position to Walpole and to George II's preoccupation with Hanover. As effective head of the administration (1756–61), he successfully directed British policy in the Seven Years' War (1756–63). He again formed an administration (1766–8) as lord privy seal, but suffered increasingly from mental and physical illness. His last years were devoted to urging the conciliation of the American colonies

Pitt, William (1759–1806), known as the 'Younger Pitt', British statesman, son of the Elder Pitt. He entered parliament (1781), was chancellor of the Exchequer (1782–3) and was appointed prime minister (1783–1801 and 1804–6) by George III. He refused to resign despite repeated Commons defeats during his first year in office, and gained a majority in the 1784 elections. A liberal Tory, he reduced the national debt and many tariffs, negotiated a commercial treaty with France (1786), placed India under government control (1784) and reorganized the government of Canada (1791). His free-trade policies were upset by the outbreak of the French Revolutionary Wars (1792–1802), in which he took the lead in organizing coalitions against the French (1793, 1798). He passed the Act of Union with Ireland (1800), but resigned when George III refused to approve Catholic Emancipation (1801). Recalled to office (1804), he organized another coalition against the French in the Napoleonic Wars, but died soon after the news of Napoleon's crushing victory at Austerlitz (1805)

Pius VII (Barnaba Chiaramonti, 1740–1823), pope (1800–23). He negotiated with Napoleon the Concordat of 1801, reestablishing Catholicism in France, and anointed Napoleon as emperor (1804). He was a prisoner of the French (1809–14). He restored the Society of Jesus (1814)

Pius IX (Giovanni Mastai-Ferretti, 1792–1878), pope (1846–78). His early liberal reforms were welcomed by Italian patriots, but were abandoned after revolution drove him to Gaeta (1848). He was restored to Rome (1850) and maintained there by a French armed force until 1870, when the French withdrew and Italy seized the remainder of the Papal States except Vatican City, to which the pope was thereafter confined. He promulgated the dogma of the Immaculate Conception (1854), and convened the 1st Vatican Council, which proclaimed papal infallibility (1870)

Pius X, St (Giuseppe Sarto, 1835–1914), pope (1903–14). He ordered the Church in France to surrender its property to the French government rather than submit to State control (1906). He condemned Modernism (1907). He encouraged frequent Communion (1905), reorganized the Curia (1908), revised the missal and breviary (1911), began a new codification of canon law, and encouraged the use of plainsong

Pius XI (Achille Ratti, 1857–1939), pope (1922–39). He established papal relations with Italy by the Lateran Treaty (1929). He condemned Fascism (1931), Nazism (1937) and Communism (1937). He was eloquent in his criticism of laissez-faire capitalism and urging of social reform, notably in the encyclical 'Quadragesimo Anno' (1931). He encouraged the laity to participate more in the work of the Church, and set up a radio station in the Vatican

Pius XII (Eugenio Pacelli, 1876–1958), pope (1939–58). He attempted to alleviate the suffering caused by the 2nd world war, and denounced Communist persecution of Christianity. He defined the dogma of the Assumption (1950)

losopher. At 20 he became a follower of Socrates. Their association continued until the death of Socrates, and thereafter Plato devoted his life to philosophy. In 388 he founded the Academy. Socrates was the crucial influence in his development as a philosopher, but Plato achieved a synthesis of all Greek thought that had preceded him. Plato's writings, mainly in dialogue form, deal with mathematics, politics, beauty, the laws of thought, education, love, friendship, etc. But he never treated any specialized subject for its own sake; all are subordinated to his central interest, the Good, or virtue. Though he regarded mathematics as a valuable discipline to thought, he took little interest in science. His use of dialogue reflects his belief that man cannot find the truth alone, that he approaches it through discussion, through the clash of ideas and personalities. He often sets forth his ideas with the help of myths, some solemn, some playful but always poetic. Socrates is the central character in all but the last dialogues. 'Apology' and 'Crito' deal with the trial and death of Socrates. Those that follow present the Socratic method of argument (SOCRATIC IRONY). False ideas are exposed, but the main

rates is most fully developed in 'Phaedo' and 'Symposium.' At the same time Plato begins to move away from the historical Socrates. His characteristic method of rising toward higher truth by a synthesis of antagonisms makes its appearance. He introduces his theory of ideas (IDEA), and in the 'Republic' he formulates his conception of a perfect state. The late work 'Parmenides,' 'Critias,' 'Timaeus,' 'Statesman,' 'Laws' becomes increasingly expository, and the Socratic element disappears. The Platonic

prung equally from his elaboration and clarification of the laws of reasoning and perhaps more of all from his own person as an embodi

Platt (plæt), Orville Hitchcock (1827–1905), American legislator. He drew up the Platt Amendment (1905), which provided for U.S. intervention in Cuba

Platt Amendment a series of amendments to the Army Appropriations Bill of 1901, sponsored by U.S. Sen. Orville H. Platt, that defined U.S.-Cuba relations during the period 1901–34. The Platt Amendment essentially made Cuba a U.S. protectorate, limiting the island's treaty-making capacity, restricting its ability to contract public debt and giving the U.S.A. the right to maintain naval bases in Cuba and to intervene in Cuban affairs as necessary to preserve order or Cuba's independence. These provisions were appended to Cuba's constitution (1901). U.S. troops were withdrawn (1902) and the provisions were formalized by treaty (1903). Considered a symbol of 'Yankee imperialism,' the treaty was repealed by the U.S. (1934), however, the lease on the U.S. naval base at Guantánamo Bay was continued

The most common pattern for the formation of the written plural of English nouns is the addition of -s. A final -e is usually retained, and ending in -ss, -sh, -ch, -s, -x (e.g. masses, rushes, marches, gases, foxes), or to words ending in -y preceded by a consonant or by -qu, the -y being changed to -i- (e.g. navy - navies, soliloquy - soliloquies) or to some words ending in -o preceded by a consonant (e.g. tomato - tomatoes) -s alone is added to most words ending in -o preceded by a consonant, and to all words ending in -o preceded by a vowel (e.g. piano - pianos). Irregular formations of plurals of English nouns include -s for many words ending in -f, the -f changing to -ve- (e.g. calf-calves) -en is added to some nouns (e.g. ox-oxen) or some words ended in -child (-children). Change of vowel is another formation (e.g. man-men, goose - geese). Sometimes the plural is the same as the singular (e.g. Chinese, sheep, moose) In some cases the plural may be different or may remain the same (e.g. fish-fishes or fish-fish). Some words have only one form, which may be singular or plural (e.g. scissors). Some Latin and Greek plurals are carried over into English (e.g. alumnus-alumni, analysis-analyses) Some other foreign plurals are also carried over (e.g. Hebrew seraph -seraphim). The plurals of letters, symbols etc. add -'s (e.g. two p's, a row of 0's)

point *v.t.* to give a point to, *to point a pencil* ‖ (often with 'up') to give force or emphasis to, *to point a speech with jokes* ‖ to cause (something) to be turned towards a particular person or object, or in a particular direction, *to point a gun at someone, he pointed the car south* ‖ to fill the joints in brickwork, masonry etc. using a special trowel ‖ to mark (Semitic vowels) with points ‖ to mark (a printed text) for the reading with indications showing how to phrase when chanting ‖ (of certain gundogs) to indicate the presence of game by standing fixedly, sometimes and assuming a rigid stance with one forepaw upraised and the tail extended ‖ to reef (a sail) with points ‖ *v.i.* (with 'at', 'to', 'towards' etc.) to indicate position or direction with or as if with a finger, *to point at a crack in the ceiling* ‖ to be turned in a particular direction, *an arrow pointing to the south* ‖ (*naut.*) to sail close to the wind ‖ (of certain gundogs) to point game **to point out** to direct attention to ‖ to explain, *he pointed out that it was not his fault* **to point to** to indicate **towards**) to be an indication of a specified probability, *everything points to his guilt* [O.F. *pointer*]

point balance a statement prepared by futures commodities exchanges for members to show profit or loss on all open contracts by computing them to an official closing or settlement price, usu. at calendar month end

point-blank (point'blăngk') **1.** *adv.* with level aim directly, *he accused her point-blank of lying* **2.** *adj.* (of a shot) fired at a very close target ‖ (of a shooting range) so close that one takes level aim ‖ direct, *a point-blank question* [POINT + LEVANT from F. *blanc* white point (center of a target)]

point d'Al·en·con (pwĕdælăsō') a needlepoint lace made in Alencon, France. Based on the lace of Venice, it was introduced in the mid 17th c.

point duty (*Br.*) the work of a police officer in directing traffic

Pointe-à-Pi·tre (pwĕtæpē'tr) the largest town (pop. 23,889) of Guadeloupe, a seaport on the southwest coast of Grande Terre Is.

point·ed (poin'tid) *adj.* having, or being given, a sharp point ‖ (of a remark) sharply, though obliquely, critical ‖ made deliberately obvious, *his rudeness was very pointed* ‖ lively, piquant, *pointed wit* [POINT]

pointed arch (*archit.*) an arch the top of which forms a point, as in the Gothic style (esp. in contrast to the earlier rounded arch)

pointed fox the fur of the red fox dyed and treated to resemble that of the silver fox

Pointe Noire (pwĕtnwär') the chief port (pop. 141,000) of the Republic of the Congo, linked by rail to Brazzaville; shipyards

point·er (poin'tər) *n.* a person or thing that points, *the pointer on a dial* ‖ a rod used for pointing, e.g. by a lecturer ‖ a gundog of a breed having a smooth, usually white coat with brown or black spots, used for pointing game ‖ a useful indication or suggestion [POINT]

Point Four Program a program proposed (1949) by U.S. President Harry Truman, which extended technical assistance and financial aid, previously channeled to rebuild war-torn Europe, to underdeveloped areas. It became a part of the Agency for International Development (AID)

poin·til·lism (pwănt'lizəm, pwæntī lizəm) *n.* a method of painting developed by Seurat and used by certain other Postimpressionists, in which separated small dots of pure color applied to the picture surface are mixed by the viewer's eye, with an effect of increased luminosity **poin·til·list** *n.* a painter using this method [F. *pointillisme* fr. *pointiller*, to mark with dots]

point lace lace made entirely with a needle

point of diminishing return the point after which an increased amount of land, labor or money devoted to a project does not give a proportionate increase in profit

point of honor, *Br.* **point of honour** a matter on which one chooses to stake the force of a principle involving one's honor

point of impact the point where a projectile hits

point of no return the point beyond which one is committed to continue, esp. irrevocably ‖ the point on a cross-country flight after which one is nearer to the destination than to the starting point

point of order a question of debating procedure

point-of-sale (point'əvsāl') *n.* the place e.g., a retail store, where a product or service is offered to prospective customers. *abbr* **POS**

point of view a mental position from which something is considered ‖ an opinion

point-to-point (point'təpoint) *n.* a cross-country steeplechase for amateur riders from a starting point to a distant but visible point

poise (pwăz) *n.* (*phys.*) the unit of absolute viscosity of a fluid [after Jean *Poiseuille* (1799–1869), French physicist]

poise (poiz) *n.* balance ‖ carriage, bearing ‖ emotional stability, self-possession [M.E. *poys* fr. O.F.]

poise *pres. part.* **pois·ing** *past* and *past part.* **poised** *v.t.* to balance, *to carry a jug poised on one's head* ‖ to hold suspended for a moment, *to poise a javelin before hurling it* ‖ to hold (the head) in a particular way ‖ to put (esp. oneself) in a state of readiness, *to poise oneself for an ordeal* ‖ *v.i.* to be balanced ‖ to hang suspended or as if suspended, *a dancer poised in mid-air* [M.E. *poise* fr. O.F.]

Poi·seuille's law (pwæsə'z) (*phys.*) the law stating that the rate of flow of a fluid through a tube varies directly with the pressure and the fourth power of the diameter of the tube, and inversely with the length of the tube and the coefficient of viscosity, for laminar (i.e. nonturbulent) flow [after Jean *Poiseuille* (1799–1869), F. physicist who formulated the law in 1844]

poi·son (poiz'n) **1.** *n.* a substance which, by its direct action on tissues, a mucous membrane etc., or after absorption into the circulatory system, can seriously injure an organism or destroy life completely ‖ anything having a pernicious effect on the mind or character of an individual or individuals **2.** *adj.* poisonous [M.E. *poison, puison* fr. O.F.]

poison *v.t.* to injure or destroy by using a poison (to make poisonous, *to poison a well*) ‖ to exert a pernicious influence on (the mind or character of an individual or individuals) [M.E. *poisonen* fr. O.F.]

poison gas a poisonous gas used esp. in chemical warfare

poi·son·ing (poiz'nĭng) *n.* the condition produced by the application or absorption of a poison

poison ivy a member of *Rhus*, fam. *Anacardiaceae*, a genus of North American shrubs, esp. *R. toxicodendron*, common in the eastern and central U.S.A. These shrubs exude an irritating oil capable of causing a violently itchy skin rash

poison oak a shrubby variety of poison ivy ‖ any of various poison sumacs

poi·son·ous (poiz'nəs) *adj.* having the properties or effects of a poison ‖ impregnated with, or containing poison ‖ as pernicious or deadly as a poison, *a poisonous influence* (*pop.*) hateful, *a poisonous fellow*

poi·son-pen (poiz'npen) *adj.* written anonymously and with deliberate malice, *a poison-pen letter*

poison sumac, poison sumach (*Rhus vernix*) fam. *Anacardiaceae*, a North American swamp sumac having pinnate leaves, greenish flowers and greenish-white berries. It produces an irritating oil like that of poison ivy

Poisson (pwăsôN') Simeon Denis (1781–1840), French mathematician and physicist, noted for his contributions to electrostatics and mechanics

Poisson's ratio *phys.* the ratio between the lateral and longitudinal strains in a stretched wire or rod (symbol σ)

Poi·tiers (pwætyā') the chief town (pop. 81,313) of Vienne, France, and historical capital of Poitou. Gothic cathedral (12th–13th cc.), Romanesque and pre-Romanesque churches. University (1431)

Poitiers, Battle of a battle (732) in which Charles Martel repulsed the Moslem invasion of Europe ‖ an English victory (1356) in the Hundred Years' War. The Black Prince fought

a brilliant defensive battle against the French, who greatly outnumbered his army

Poi·tou (pwätu:) a former province of W France between the Paris and Garonne basins, comprising Vienne and Deux-Sèvres departments inland, and Vendée on the Atlantic, with parts of Charente (inland) and Charente-Maritime (coast). It consists largely of limestone plains, partly fertile, partly sandy. The coast is marshy. Agriculture: cereals, market produce, beef cattle, dairy farming. Historic capital: Poitiers. United with Aquitaine, it went to England through Henry II (1152), was taken back by the French, first in 1224, finally in 1369

poke (pouk) **1.** *v. pres. part.* **pok·ing** *past* and *past part.* **poked** *v.t.* to thrust quickly the tip of some object, e.g. a finger, into (someone or something), *to poke someone in the ribs* ‖ to thrust (something) forward, or into or through an aperture, *to poke one's finger into a crack* ‖ to insert (an object) into something soft, *he poked his finger into the clay* ‖ to make (a hole) by doing this ‖ to stir up (a fire in a grate etc.) with a poker ‖ (*pop.*) to hit with a short, jabbing blow of the fist ‖ *v.i.* to make little digs or thrusts with a stick, finger etc. ‖ to be thrust forward through an aperture, *his head poked through the door* ‖ to go slowly, dawdle **to poke around** to examine things in a nosy or desultory way ‖ to busy oneself without any apparent purpose, *he is poking around in the garden* **to poke fun at** to make the object of ridicule **2.** *n.* the act of poking ‖ (*old-fash.*) a poke bonnet ‖ (*pop.*) a short, jabbing blow with the fist ‖ a slow-moving person, slow coach [M.E. *poken*]

poke bonnet (*old-fash.*) a woman's bonnet having a projecting brim in the front

po·ker (poukər) *n.* a gambling game played with 52 cards (each player being dealt 5 or 7 cards), and based on the relative value of certain combinations of cards. To stay in the game a player must either equal or raise the bets made by other players. These bets, in the form of money or chips, constitute the pot, which is won by the possessor of the highest card combi- [illegible] in the game

poker *n.* a heavy, usually iron, rod used to poke a fire [POKE v.]

poker face a face revealing no emotion whatso- [illegible]

poker work the art of making decorative designs on wood, leather, calabashes etc. by burning or scorching with a hot instrument ‖ this decoration, or articles so decorated

poke·sy (poukzi) *adj.* word combining 'pokey' and 'folksy', meaning easygoing

poke·weed (poukwi:d) *n.* *Phytolacca americana*, fam. *Phytolaccaceae*, a North American perennial plant, having greenish-white flowers, poisonous purple berries and edible [illegible]

poky, pokey [illegible]

pok·i·est *adj.* (of a small room, house etc.) inconveniently small ‖ (esp. of a town) small, drab and dull ‖ (of a person) slow, lazy

Poland [illegible] miles, pop. 36,229,000) of central Europe on the Baltic. Capital: Warsaw. People: 98% Polish, with Ukrainian, Byelorussian and other minorities. Language: Polish. Religion: 95% Roman Catholic, 1.5% Orthodox, 5% Protestant, with smaller Old Catholic and Jewish minorities. The land is 54% arable, 13% pasture and 23% forest. It is largely a plain, rising to a slightly elevated (mainly 600–1,000 ft) plateau in the southwest quarter, the country's richest agricultural district, and to the wooded Sudeten and Carpathian Mtns ('BESKIDS, 'TATRA MTNS) along the southern border. The north (with N. East Germany) forms part of the Baltic lake plateau (coastal lagoons, sandy soil, marshes, peat deposits, hundreds of lakes). Climate: continental. The Oder is frozen an average of 40 [illegible] tures (°F.: Jan. 26, July 64). Rainfall: War- [illegible] cattle, hogs, sheep, horses. Agricultural prod- [illegible] ring. Mineral resources: coal, lignite, iron ore [illegible] Manufactures and industries: rapidly develop- ing: mining, iron and steel, motor vehicles, tiles, lumber, chemicals, foodstuffs, leather, rubber goods, paper, cement, shipbuilding, glass, fertilizers, footwear, hydroelectricity. Exports: coal, rolling stock, coke, lignite, ships, chemicals, cement, machinery, iron and steel, sugar, wood and pulp, textiles, eggs. Imports: iron ore, oil and petroleum products, fertilizers, wheat, cotton, wool, zinc concentrates. Chief ports: Gdynia, Gdansk, Szczecin. There are 8 universities, including Krakow (1364) and Warsaw (1816). Monetary unit: zloty (100 groszy). HISTORY. The lower valleys of the Oder and the Vistula, inhabited by Slavs, were united in one duchy (10th c.) and the people became Christians. This territory was expanded to cover most of modern Poland until 1138, when it was split up into a number of duchies. The Teutonic Knights conquered East Prussia (13th c.), cutting off Poland's access to the Baltic. Poland was reunited (14th c.) under Casimir III, and became a refuge for the Jews expelled from W. Europe. Under Ladislaw II, the founder of the Jagiello dynasty, Lithuania was united to Poland (1386) and the Teutonic Knights were decisively defeated at Tannenberg (1410). The kingdom was enlarged to include parts of White Russia and the Ukraine, a constitutional monarchy was established, and a flourishing culture developed. The Reformation made some impact on the nobility, but Catholicism was reestablished by the end of the 16th c. After the death (1572) of the last Jagiello, an elective monarchy was instituted. This weakened the country by provoking civil wars, and involved Poland in wars with the Turks, Sweden and Russia. John III defeated the Turks at Vienna (1683), but by his death (1696) Poland had ceased to be a great power. It was further weakened by the War of the Polish Succession (1733–5) and was finally annihilated when Austria, Russia and Prussia agreed to partition Poland. In the 1st partition (1772) Prussia took northwestern Poland (except Gdansk), Austria took Galicia, and Russia took land east of the Dvina. In the 2nd partition (1793) Prussia and Russia took more than half of what remained. A revolt (1794) led by Kosciusko prompted the 3rd partition (1795), in which Austria, Prussia and Russia annexed all the remainder, and Poland completely disappeared. Napoleon formed the Grand Duchy of Warsaw (1807) but this was abolished (1815) by the Congress of Vienna and the land redistributed to Austria, Prussia and Russia. Polish revolts were harshly put down (1830, 1846, 1848 and 1863) but the independence movement remained strong. In the 1st world war, Pilsudski organized Polish legions to oppose Russia. Poland was reestablished as an independent state (1918) and given access to the Baltic through the Polish Corridor. Frontier disputes caused fighting with the Germans, the Czechs, the Russians and the Ukrainians until 1921. National minorities and the economic backwardness of the country were severe problems. Pilsudski established a dictatorship after a coup d'etat (1926). Nazi Germany invaded Poland (Sept. 1, 1939), provoking the 2nd world war, and the country was partitioned between Germany and the U.S.S.R. The population, esp. the Jews, were subject to mass deportation and extermination. A large underground resistance movement developed and a government in exile was formed in London. Many Polish exiles fought in the Allied forces. The German army was expelled by the Russians (1945) and the state of Poland was reestablished with the addition of former German territory east of the Oder-Neisse line and Russian territory west of the Curzon line. Communists immediately dominated the Polish government, and took it over completely (1947), establishing a people's republic. After mass riots (1956), Gomulka took power and the regime became more liberal. Poland's eastern frontiers were recognized (1970) 'de facto' by the West German government. A social and economic crisis (Dec. 1970) provoked riots. Gomulka was replaced by Gierek. An industrial boom in the early 1970's was followed by economic difficulties, which led to food-price [illegible] again led to unrest, culminating in a workers' takeover of the Gdansk shipyards. Strikes spread to include 350,000 workers throughout Poland until the government granted pay increases and the right to form independent unions, the new unions subsequently became [illegible] Gierek was replaced by Stanislaw Kania, who announced economic reforms. Solidarity's call for a five-day work week (1981) was agreed to by the government, but following the settlement Premier Jozef Pinkowski (1980–1) was replaced by Defense Minister Gen. Wojciech Jaruzelski, who also replaced Kania as party leader later that year as strikes and protests about food shortages continued. Following a call by Solidarity for a referendum on the competence of the government, Jaruzelski imposed martial law and outlawed Solidarity. Martial law was not lifted until 1983, and the government still retained the power to restrict union activity. After a new parliament was elected (1985), Jaruzelski assumed the office of president, and handed the premiership over to Zbigniew Messner

po·lar (póulər) **1.** *adj.* of or pertaining to the regions of the earth, or of the celestial sphere, located near the poles ‖ of or pertaining to the pole of a magnet, *polar force* ‖ of or pertaining to positive and negative electric charges ‖ (*chem.*) electrovalent ‖ (*chem., phys.*) having a dipole ‖ (*math.*) of a relationship to a fixed point (pole) ‖ opposite in nature, character etc., *polar views* ‖ (*rhet.*) guiding, *a polar principle* **2.** *n.* (*math.*) a polar curve ‖ (*math.*) a line joining the intersections of tangents drawn from a pole to a conic section [fr. M.L. *polaris*]

polar bear *Thalarctos maritimus*, a powerful bear inhabiting the Arctic regions, having a long body (up to 9 ft), a narrow, pointed head, and shaggy yellowish-white fur. It feeds mainly on fish, seals and grasses

polar body a polocyte

polar cap the white region at each pole of the planet Mars

polar circle one of the circular zones parallel to the equator, and at a distance of 23° 27′ from each pole (cf. ARCTIC CIRCLE, cf. ANTARCTIC CIRCLE)

polar climate a climatic regime of the Arctic, Antarctic and high mountain regions, characterized by continuous below-freezing temperatures, low precipitation and little seasonal variation

polar coordinates (*math.*) the distance *r* of a point from a pole (a fixed point of reference) and the angle θ made by the line joining the point and the pole with a fixed axis passing through the pole

polar curve a curve drawn in polar coordinates

polar distance the angular distance of a point on a sphere from the nearest pole

polar front the boundary between the cold climate of the polar regions and the warmer climate of the temperate latitudes

po·lar·im·e·ter (poulərimitər) *n.* an instrument used to measure optical rotation ‖ an instrument used to measure the degree of polarization of light in a partially polarized ray [fr. M.L. *polaris*, polar + METER]

Po·la·ris (poulɛ́əris, poulǽris) *n.* the polestar [Mod. L. short for *stella polaris*, polar star]

Polaris *n.* (*mil.*) an underwater/surface-launched, surface-to-surface solid-propellant, computer-guided ballistic missile (UGM-27), equipped with inertial guidance and nuclear warheads with ranges 1,200 to 2,500 nautical mi. It was replaced by Poseidon

po·lar·i·scope (poulæriskoup) *n.* a polarimeter used to measure optical rotation

po·lar·i·ty (poulæriti:) *n.* the quality of having poles ‖ the state of having one or other of two opposite polar conditions, *positive or negative polarity* ‖ the tendency of bodies having magnetic poles to align them with the earth's poles [POLAR]

po·lar·i·za·tion (poulərizéiʃən, *Br.* pouləraizéiʃən) *n.* the act of polarizing ‖ the state of being polarized, used esp. of light and other transverse wave radiation to signify a special relation between the direction of propagation and the plane of vibration of the waves. In plane or linearly polarized radiation (e.g. light) the vibrations of the waves are confined to a single plane that includes the direction of propagation (as distinguished from nonpolarized light, where the planes of vibration of the waves may be any, including the direction of propagation). Light may be polarized by various means, e.g. by scattering, by its passage through a dichroic material, by its passage through birefringent materials or by reflection from nonmetallic surfaces. ‖ the gradual decrease in the voltage of an electrolytic cell associated with the accumula-

tion of gaseous materials on one or both electrodes (also called electrolytic polarization) ‖ the slight shifting of electrons with respect to nuclei in a dielectric or other substance when it is placed in an electric field (also called dielectric or induced polarization) ‖ magnetization

po·lar·ize (poulərauz) *pres. part.* **po·lar·iz·ing** *past* and *past part.* **po·lar·ized** *v.t.* to produce polarization in or give polarity to ‖ to determine the relative importance of, or to fix the relative direction of, *to polarize the efforts of a team of researchers* ‖ *v.i.* to become concentrated around two opposites or extremes ‖ to serve as a point around which concentration takes place [F. *polariser*]

polarizing microscope a microscope employing polarized light, used to study crystal structure

po·lar·o·graph (poulerəgraf, poulærəgraf) *n.* an instrument to record the degree of electric polarization in an electrolyte, esp. in microanalysis [after *Polarograph*, a trademark fr M.I. *polaris*, polar + Gk *graphein*, write]

po·lar·oid (póulərɔid) *n.* a film in which multitudes of polarizing minute crystals are orientated parallel to one another, so that the film polarizes the light it transmits. It is used in sunglasses to prevent glare and in a variety of optical instruments [after *Polaroid*, a trademark]

Polaroid *n.* trademark of Polaroid Corp., producer of Polaroid Land instant-picture cameras and of light-polarizing material, etc

Po·la·vi·sion (póuləvɪʒən) *n.* trademark for instant motion picture-making device by Polaroid Corp.

pol·der (póuldər) *n.* an area of low lying land reclaimed from the sea or other large body of water and usually protected by dikes [Du.]

Pole (póul), Reginald (1500–58), English cardinal, archbishop of Canterbury (1556–8). He went into exile (1532) when he opposed Henry VIII's divorce, but returned (1553) as papal legate and attempted to restore Roman Catholicism in England during the reign of Mary I

Pole *n.* a native or inhabitant of Poland [G. fr Pol. *poljane*, field-dwellers]

pole *n.* (*biol.*) either of two differentiated areas that lie at opposite ends of an axis, e.g. the ends of the spindle in mitosis or the animal and vegetal poles in an egg ‖ either of the terminals of a battery, cell or dynamo etc. between which a current will flow when connected by an external conductor (i.e. between which a potential difference exists) ‖ one of the two or more points in a magnet where most of the magnetic flux is concentrated ‖ one of two extremes, *the poles of an argument* ‖ a point of attraction **Pole** either end of the axis of a sphere, e.g. the North Pole or South Pole of the earth or the celestial sphere [fr. L. *polus* fr. Gk]

pole 1. *n.* a long, usually rounded piece of wood or other material, *tent pole, telegraph pole* ‖ the wooden shaft of a wagon or carriage attached to the front axle and extending between the wheelhorses ‖ a unit of length, esp. one measuring 16 ½ ft ‖ a unit of area measuring 30 ¼ square yards ‖ (*naut.*) a mast, esp. the upper end ‖ the tail of an otter **2.** *v.t. pres. part.* **pol·ing** *past* and *past part.* **poled** to propel (a punt etc.) by using a pole ‖ to furnish with poles, *to pole beans* [O.E. *pāl* fr. L.]

pole·ax, pole·axe (póulæks) **1.** *pl.* **pole·ax·es** *n.* (*hist.*) an ax set in a long handle used as a weapon ‖ (*hist.*) such an ax fitted with a hook, used for grappling an enemy vessel, cutting the ship's tackle etc. ‖ a long-handled, hammer-backed ax used for slaughtering cattle **2.** *v.t. pres. part.* **pole·ax·ing** *past* and *past part.* **pole·axed** to kill or render unconscious by hitting with a poleax [M.E. *pollax* fr. *poll*, the head (*ax*, ax)]

pole bean a climbing bean (cf. BUSH BEAN)

pole·cat (póulkæt) *n. Mustela putorius*, fam. *Mustelidae*, a European carnivorous mammal about 2 ft long, having brown and black fur and white head markings ‖ (*pop.*) a skunk [M.E. *pol cat*, prob. fr. O.F. *pole*, a hen (CAT)]

pole lamp lighting fixture with lamps on a pole, often from floor to ceiling

po·lem·ic (pəlémik, poulémik) **1.** *adj.* of or pertaining to controversy **2.** *n.* a disputation ‖ a person who takes part in a controversy, esp. a theological controversy. **pole·mical** *adj.* **pole·mi·cal·ly** *adv.* **pole·mi·cist** *n.* a person who engages in polemics **po·lém·ics** *n.* (construed as *sing.* or *pl.*) the art or practice of theological or political controversy [fr. *polemikos* fr. *polemos*, war]

pole·mol·o·gy (poulemɔlədʒi) *n.* [coined fr. Gk *polemos*, war + *logos*, discourse] the study of war

pole·na (pəlénə) *n.* [coined fr. Gk *polein*, to turn + *ainos*, a tale] a type of tarot deck made from the 17th c.

pole position *n.* (*motor racing*) the position closest to the infield, i.e., the one offering shortest circumference **2.** by extension, an outstandingly advantageous position

pole·star (poulstar) *n.* a bright star in the constellation Ursa Minor

pole strength a measure of the magnetic flux emanating from a given magnetic pole expressed in unit magnetic poles

Pope (poup), Alexander (1688–1744), English poet. The publication of 'An Essay on Criticism' (1711) established him as a master of didactic poetry and of the heroic couplet. 'The Rape of the Lock' (1712, 1714) [illegible] ridiculing the society of his time. 'An Epistle to Dr Arbuthnot' (1735) is a bitter but scintillating attack on Addison and 'The Dunciad' (1728, with an added book IV 1742) is a virulent satire on the literary critics of the day. Pope made the heroic couplet a supremely supple form. The repertory of diction provided e.g. by his translation of Homer (on which he worked 1715–26) was to be predominant up to the Romantic age. His poetry was essentially of the intellect, and in its conversational tone, moral concern and exuberant conceits of fancy it belongs in the tradition of Donne and Marvell. But another side of his work, seen e.g. in 'Windsor Forest' (1713) and 'Eloisa to Abelard', inspired sentiment of a kind which helped to bring in the Romantic movement

Port Roy·al (portrɔiəl, pourtrɔiəl, porrwɑjael) a convent of Cistercian nuns founded in 1204 near Chevreuse, France. It was reformed (1608) by Angélique Arnauld, and transferred (1625) to Paris. It came (1636) under the spiritual direction of Duvergier de Hauranne. It became, with an associated group of scholarly solitaries including Antoine Arnauld living at the Chevreuse convent, a center of Jansenism. A school, the Petites Ecoles de Port Royal, was established (1638), and Racine was among the pupils. Some nuns returned to the old convent (1648) and the men took up residence on a nearby farm. It was here that Pascal retired (1654). As one of the measures to suppress Jansenism Louis XIV closed the old convent (1709), and it was razed (1712). Universities: Coimbra 1290, Lisbon 1911, Oporto [illegible]. Currency unit: escudo (100 centavos). HISTORY Originally inhabited by Iberians, Portugal was visited by Phoenician traders (9th c. B.C.). The Greeks founded colonies (6th–5th cc. B.C.), and the Romans made the area part of the province of Lusitania (2nd c. B.C.). Together with the rest of the Iberian Peninsula, Portugal was overrun by the Visigoths (5th c.) and the Moors (8th c.). It was one of the first areas reconquered from the Moors (11th c.), was made a county (1095) by Alfonso VI, and became a kingdom (1143). By 1249 Portugal had expanded to approximately its modern extent. Under Ferdinand I and John I Portugal was at war with Castile and was supported by England. A permanent alliance was formed (1386) with England. The patronage of Henry the Navigator encouraged Portuguese geographers and navigators to explore the west coast of Africa and parts of South America. Prominent in this age of expansion were Dias, da Gama and Cabral. Portugal and Spain, the two leading colonial powers, divided the undiscovered world between themselves in the Treaty of Tordesillas (1494). In the mid-16th c. Portugal had acquired a vast empire which included Morocco, Brazil, and parts of East Africa and the East Indies. The climax of prosperity was reached under Manuel I and John III, but decline set in rapidly (mid-16th c.) as the economic effects of the expulsion of the Jews (1497) were felt and as Portugal's limited resources and tiny population were unable to compete with the rise of English and Dutch sea power. Philip II of Spain seized the throne (1580). Portugal suffered economically under Spanish rule and lost control of the East Indies to the Dutch. A revolt (1640) brought John IV to the throne. The Methuen Treaty (1703) helped to strengthen the economy, and the marquês de Pombal built up agriculture and trade with a strong mercantilist policy (mid-18th c.). When Portugal refused to obey Napoleon's embargo on trade with Britain, it was invaded by the French, the royal family fled to Brazil (1808) and the Peninsular War broke out. With the restoration of peace, the royal family returned but Brazil declared itself independent (1822). After political struggles between liberals and absolutists throughout the 19th c., Portugal became a republic (1910). The colonization of Mozambique and Angola (late 19th c.) caused ill feeling between Britain and Portugal, but Portugal joined the Allies in the 1st world war. Political and economic chaos worsened until Salazar was appointed finance minister (1928). Salazar became prime minister (1932), established a dictatorship, and kept Portugal neutral in the 2nd world war. Portugal joined NATO (1949), the U.N. (1955) and the European Free Trade Association (1959). Attempts were made to modernize industry and agriculture (1950s). Salazar resigned (1968) on grounds of health. Portugal was widely criticized (1960s) for its dealings with Angola and Mozambique. Salazar's successor as premier, Marcello Caetano, was overthrown in a military coup (1974) led by Gen. Antonio de Spinola, and democratic government was restored under a military junta. Portugal granted independence to its African colonies that same year. The constitution of 1976 committed the country to socialist goals and a minority socialist government under Mario Soares came to power (1976–8). After several short-lived successors, the right-centrist Democratic Alliance coalition, headed by Francisco Sa Carneiro, took over the government. After Sa Carneiro's death (1980) Francisco Pinto Balsemao became head of the Democratic Alliance and premier. He remained in office until 1982, and after a six-month political crisis, a new coalition headed by Soares was formed. [Port.]

Pound (pound), Ezra (1885–1972), American poet. Pound began as an imagist, but his work soon transcended the limits of imagism. The most obvious feature is the delicate control of the rhythm, which conveys a tone of subtle witty comment. The element of elaborate artifice, even pedantry and sometime romantic archaism and mystification progressively took control in his work. His masterpiece, the still-unfinished 'Cantos' (begun 1919), is a brilliant though often obscure work woven of myth and legend in which he attempts to reconstruct the history of civilization. Other important works are 'Homage to Sextus Propertius' (1918) and 'Hugh Selwyn Mauberley' (1920).

Pous-sin (po͞osăN'), Nicolas (1594–1665), French painter who lived mainly in Rome. His early works, based on mythological and elegiac subjects, display dramatic and sensuous beauty, and show the influence of Titian and Veronese. The strict classicism which he went on to develop allowed no compromise with intellectual content: the moral statement of the picture must be fully served by color and composition. His themes are heroic, involving some dramatic moment of classical or biblical inspiration and a central psychological crisis. He sets down a vision of a world of dignity and nobility, with intense power. In landscape painting his ideal is in total contrast with that of Claude Lorrain.

The technique of printing was known to the Chinese as early as the 9th c. In the European Middle Ages pictures and playing cards were [illegible]

printed from wood blocks. It was not until c. 1436 that Gutenberg invented the technique of casting single metal letters (types) which could be assembled together to form a continuous text. The first book printed from movable types was probably the celebrated 42-line Bible produced (c. 1452-5) by Gutenberg in Mainz. The art quickly spread to Italy, Venice, Switzerland, France, the Low Countries, Spain and England. The Renaissance and Reformation almost coincided with the development of printing, and were greatly assisted by it. The spread of learning and the production of the works of the Reformers gave printers a crucial importance. At first books remained expensive, and were produced in small numbers, but editions of 1,500-3,000 became common in the 16th c. and [illegible].

Until the early 19th c. printing developed little. The old wooden printing press was improved but not substantially changed. Type was set, and paper made, by hand. In 1802 the first papermaking machine was invented. In 1811 the mechanical press, which could be driven by steam, was invented. In 1804 stereotyping was perfected, enabling casts to be taken of whole pages of type. The mechanization of printing coincided with the movement towards universal education. Vast audiences were thus created at the same time as the craft became one of mass production.

Proust, Marcel (1871–1922), French novelist. His 'A la recherche du temps perdu' (1913–27), in seven novels, recreates in fictional form Proust's own childhood in Paris and the Normandy countryside. In effect it re-creates the society, especially the upper-class society, of Paris at the turn of the century. Certain themes emerge, above all that of the transforming power of dominant love, and the effects it has on the lover's vision of the beloved and the world. But in a sense the whole work is about the transformation of the universe by the individual perceiving and suffering sensibility. The style reflects this characteristic of personal vision: it is highly poetic and complex, full of elaborate imagery. The work has had a profound influence on the art of the novel

Prus·sia (prʌʃə) the former largest state of Germany (area in 1939 113,545 sq. miles, pop. 41,762,000). It extended from France and the Low Countries to the Baltic Sea and Poland, and included the provinces of East Prussia, Brandenburg, Berlin, Pomerania, Grenzmark, Silesia, Prussian Saxony, Schleswig-Holstein, Hanover, Westphalia, Hesse-Nassau, Rhine Province, Hohenzollern. Its people, from the 10th c. onwards as Prussians were overrun and converted to Christianity (mid 13th c.) by the Teutonic Knights. Rebellion against the [illegible] Prussia under Polish suzerainty. The Knights' grand master, Albert of Ansbach and Bayreuth, a member of a [illegible] duke of Prussia (1525), which was converted to a secular duchy under the crown of Poland. The duchy passed (1618) to the house of Brandenburg [illegible] Great Elector, gained full independence (1660) from Poland. The Reformation and the Treaties of [illegible] tory. Elector Frederick III of Brandenburg, duke of Prussia, was crowned (1701) King Frederick I of Prussia. Frederick William I (1713–40) built up a unified state founded on Junker power and developed a strong army. Under Frederick the Great (1740–86) Prussia started a policy of ruthless conquest, gaining Silesia from the War of the Austrian Succession (1740–8), and emerging from the Seven Years' War (1756–63) as the chief military power of the Continent. More territory was gained in the partitions of Poland (1772, 1793, 1795). Under Frederick William II (1786–97) Prussia entered the French Revolutionary War, but agreed by the Treaty of Basle (1795) to withdraw from the coalition. Frederick William III (1797–1840) reopened the struggle against France, but met with total defeat at Jena (1806) and humiliation in the Treaty of Tilsit (1807). Prussia was transformed by the social reforms of Stein and Hardenberg, the educational reforms of Humboldt and the army reforms of Scharnhorst and Gneisenau. Prussia again joined (1813) the coalition against France, participating in the defeat of Napoleon at the Battle of the Nations (1813) and Waterloo (1815). The Congress of Vienna increased Prussian territory considerably, notably along the Rhine, and incorporated Prussia in the German Confederation. Prussia's reactionary policy after entering the Holy Alliance was modified only by her organization (1834) of the Zollverein. Under Frederick William IV the 1848 revolution was put down, and the German Confederation revived, although Prussia was granted a constitution. Bismarck, appointed chancellor (1861) by Wilhelm I (1861–88), eliminated Austria from German affairs by fighting Denmark (1864) over Schleswig-Holstein, by the Seven Weeks War (1866), and by the Franco-Prussian War (1870–1). The king of Prussia was proclaimed emperor of the new German Empire (1871), which was dominated by Prussian control of foreign and military affairs. Prussia remained part of Germany until the collapse of the Third Reich (1945), when it was divided among the U.S.S.R., Poland, East Germany and West Germany

Territorial university (founded as a normal school, 1900) at Rio Piedras, near San Juan. Some land has been redistributed, but there is heavy emigration to the mainland, esp. New York City. HISTORY Puerto Rico was inhabited by the Arawak and Carib Indians when Columbus landed there (1493) during his second voyage. The island was explored (1508) by Ponce de León, who founded the city of San Juan de Puerto Rico in the same year. During the colonial period it lay under the authority of the Audiencia de Santo Domingo and was subjected to numerous attacks by pirates, notably Drake, who set fire (1595) to San Juan. During the 18th c. Britain attempted on three occasions to take possession of the island and to annex it to Jamaica. Following several independence movements during the 19th c., the island was occupied by the U.S.A. in the Spanish-American War and was ceded to the U.S.A. (1898) in the Treaty of Paris. Government was at first in the hands of the military. In 1917 Puerto Ricans obtained U.S. citizenship. President Franklin Roosevelt initiated (mid-1930s) a New Deal measure, the Puerto Rico Reconstruction Administration (PRRA), which gave rise (1938) to the Popular Democratic party (PDP), led by Luis Muñoz Marin. It initiated reforms, notably land distribution, enforcement of minimum wage and hour laws and a progressive income tax law, and the establishment of an economic development program known as Operation Bootstrap, initiated in 1942. President Harry Truman named (1946) Jesús T. Piñero as the first Puerto Rican governor. The U.S. government permitted (in the Organic Act, 1947) the election of governors by popular vote, the first of whom (1948) was Muñoz Marin. Endorsing a proposal made by the U.S. government, he drafted a new constitution which went into effect in 1952 and which defined Puerto Rico as an internally self-governing commonwealth or associated free state. Muñoz Marin was reelected in 1956 and 1960 and was succeeded (1964–8) by his PDP lieutenant Roberto Sánchez Vilella. In 1968 the
and
alist Luis Alberto Ferré, leader of the New Progressive party (NPP) which had been founded only one year earlier. Although Ferré had campaigned for statehood in a 1967 plebiscite which ratified (by about 60–40) the island's status as associated free state, he did not interpret his election as a mandate for statehood, but favored another plebiscite in 1971. By the early 1980s federal budget cuts, a worldwide recession, and an erosion of Puerto Rico's competitive advantages caused an economic slump that led to demands for greater autonomy, with or without change in commonwealth status. Debate continued among factions favoring commonwealth, statehood and independence

Puerto Rico Reconstruction Administration (PRRA), a New Deal agency established (mid-1930s) to readjust the distribution of economic power in Puerto Rico. It placed a restrictive quota on sugar production and enforced a law limiting corporation holdings to 500 acres. It established a cooperative sugar mill to compete with private mills, and catered to the long-neglected coffee and tobacco interests. The PRRA gave birth (1938) to the Popular Democratic party

Punic Wars three wars between Rome and Carthage in which Rome became the leading power in the W. Mediterranean. Early relations had been friendly, but the Carthaginian occupation of Sicily, prompted by commercial interest, threatened the trade and security of Rome's allies, the Greek cities of S. Italy. Rome's intervention to help Messina led to the 1st Punic War (264–241 B.C.). The Romans built a fleet to challenge the naval strength of Carthage and reduced Sicily to a Roman province (241 B.C.). The Carthaginians under Hamilcar and Hannibal conquered Spain (237–219 B.C.). Hannibal's attack (219 B.C.) on Saguntum, a Roman ally in Spain, led to the 2nd Punic War (218–201 B.C.). Hannibal crossed the Rhone and the Alps into Italy and defeated the Romans at Trasimene (217 B.C.) and Cannae (216 B.C.). But worn down by the tactics of Fabius Cunctator, who avoided further pitched battles, and deprived of the help of Hasdrubal, who was defeated and killed on the Metaurus (207 B.C.), Hannibal was recalled (203 B.C.). Scipio Africanus had driven the Carthaginians from Spain (206 B.C.) and invaded Africa. After his defeat by Scipio Africanus at [illegible] the harsh Roman terms of peace Carthage nevertheless made a quick economic recovery. On the pretext of a Carthaginian attack on one of Rome's allies, Rome opened the 3rd Punic War (149–146 B.C.), landed in Africa and, under Scipio Aemilianus, destroyed Carthage completely (146 B.C.), as Cato the Elder had long urged should be done.

Puritanism arose (1560) as a protest against the ecclesiastical settlement of Elizabeth I. Puritans objected to the liturgy, vestments and episcopal organization of the Church of England, as not being warranted by the Scriptures. Sharp divisions arose among those Puritans who could be content with moderate reform, the Presbyterians (who wanted to abolish episcopacy), and the Brownists (who favored Congregationalism). Puritanism grew more vociferous and took on political overtones at the end of Elizabeth's reign and under the early Stuarts, culminating in the English Civil War and triumphing under Cromwell. Episcopacy returned with the Restoration (1660) and the Puritans became known as dissenters. Qaddafi, Muammar al- (muːʊmúrulkʊdúfiː) (1942–) Libyan head of state. An army colonel, he assumed power (1969) after leading a coup against King Idris I. He negotiated (1970) the removal of U.S. and British military bases. A Moslem fundamentalist, he instituted a cultural revolution (1973) that established the Koran as the basis of law. He took control of the Libyan oil industry (1973–4) and later abolished all private enterprise. A militant Arab nationalist, he has tried unsuccessfully to effect various mergers with Egypt, Syria, Tunisia, Chad and Morocco. Often accused by neighboring African countries of meddling in their internal political affairs, he also intervened militarily in a civil war in Chad. He has been accused of fostering international terrorism; various terrorist attacks around the world resulted in the U.S. bombing of Libya in 1986

qual·i·fi·ca·tion (kwɒlɪfɪkeɪʃən) *n.* a limiting, narrowing down, e.g. of meaning, application etc | reservation | the *statement needs some qualification*, or something that does this | a skill, quality etc. fitting a person for particular work or a particular appointment | a requirement which has to be met, *we can waive the* [illegible] *in his case* | a descriptive term *opportunist is hardly the qualification applica* [illegible]

qual·i·fi·ca·tor·y (kwɒlɪfɪkə tərɪ, kwɒlɪfɪkətourɪ) *adj.* [fr. M. L. *qualificatio* (*qualificationis*)]

qual·i·fier (kwɒlɪfaɪər) *n.* someone who or something that qualifies

qual·i·fy (kwɒlɪfaɪ) *pres. part* **qual·i·fy·ing** *past* and *past part* **qual·i·fied** *v.t.* to render fit or competent, to entitle, *one experience doesn't qualify him to speak as an authority* | to render legally capable or entitled, *residence qualifies you for membership* | to describe by attributing a quality to, *could you qualify his behavior as offensive?* | to modify, restrict, *to qualify a statement*, to make less severe, mitigate, *to qualify a* [illegible] *adjectives qualify nouns* | *v.i.* to be or become qualified | (*sports*) to reach the required standard in preliminary contests [F *qualifier*]

qual·i·ta·tive (kwɒlɪteɪtɪv) *adj.* concerned with, relating to or involving quality (cf. QUANTITA[illegible]

qualitative analysis the branch of chemistry concerned with the identification of the constituent elements in a compound mixture, e.g. by spectroscopic and spectrographic analysis (cf. QUANTITATIVE ANALYSIS)

qual·i·ty (kwɒlɪtɪ) *pl.* **qual·i·ties** *n.* grade, degree of excellence, *goods of the first quality* | excellence, worth, *a tobacco of quality* | trait, characteristic, attribute etc. | (*hist.*) high social status, *a man of quality* | (*logic*, of a proposition) [illegible] the quality [illegible]

quality control (*business*) system for ensuring quality of output involving inspection, analysis, and action to make required changes

quality of life standard of living including health, entertainment, and subjective factors, e.g., social satisfaction

qualm (kwɑm, kwɒm) *n.* a twinge of guilt, a scruple, *qualms of conscience* | a sudden feeling of anxiety or apprehension, *a qualm of fear* | a sudden sensation of nausea or faintness [etym. doubtful]

quan·da·ry (kwɒndərɪ) *pl.* **quan·da·ries** *n.* a dilemma, a state of perplexity [etym. doubtful]

quan·ta·some (kwɒntəsoum) *n.* (*botany*) the chlorophyll granule in chloroplast of plant cells, believed to be site of photosynthesis

quan·tic (kwɒntɪk) *n.* (*math.*) a rational, integrally homogeneous function of two or more variables [fr. L. *quantus*, how much]

quantic *adj.* of or relating to a quantum

quan·ti·fy (kwɒntɪfaɪ) *pres. part.* **quan·ti·fy·ing** *past* and *past part.* **quanti·fied** *v.t.* (*logic*) to specify the application of (a term) by the use of 'all', 'many', 'some' etc. | to determine the quantity of [M.L. *quantificare* fr. *quantus*, how much]

quan·ti·ta·tive (kwɒntɪteɪtɪv) *adj.* relating to or concerned with quantity | involving measurement or quantity (cf. QUALITATIVE) | of or relating to the quantity of vowels, *quantitative scansion* [fr. M. L. *quantitativus*]

quantitative analysis the branch of chemistry concerned with the determination of the relative quantities of the constituent elements in a compound or mixture, e.g. by gravimetric and volumetric analysis (cf. QUALITATIVE ANALY-[illegible])

quan·ti·ty (kwɒntɪtɪ) *pl.* **quan·ti·ties** *n.* an amount, *a small quantity of cement* | a great deal, *a quantity of jewelry was missing* | the property of things that can be measured, *the science of pure quantity* | the relative length or shortness of vowel sounds or syllables | (*logic*) the extent of the application of a proposition | (*math.*) anything which is measurable a figure or symbol used to represent this [O.F. *quantite*]

quantity surveyor someone who estimates the quantities that will be required for a building job, with their costs

quan·tize (kwɒntaɪz) *pres. part.* **quan·tiz·ing** *past* and *past part* **quan·tized** *v.t.* to subdivide (energy) into quanta | to impart a quantum to | to express in multiples of an indivisible unit, e.g., age in whole years | to treat or express in terms of quantum mechanics

Quantrill (kwɒntrɪl), William C. (1837–65) American Confederate guerrilla leader during the Civil War. Known as Quantrill's Raiders, his guerrilla bands burned and looted Union strongholds in Kansas and Missouri, and on Aug. 21, 1863, they pillaged Lawrence, Kans., killing more than 150 civilians. Quantrill was mortally wounded by Union troops (May 1865) and died in prison in Louisville, Ky.

quan·tum (kwɒntəm) *pl.* **quan·ta** (kwɒntə) *n.* amount, quantity | share | one of the very small discrete packets into which many forms of energy are subdivided, and which are always associated with a frequency v such that the product of v and Planck's constant is equal to the quantum | one of the small subdivisions of other quantized physical magnitudes (*QUANTUM NUMBER, *SHELL, *ORBITAL) [L. neut. of *quantus*, how much]

quantum chemistry the study of the mechanics of molecular physics applied to chemistry. — **quantum chemist** *n*

quantum electronics the application of the mechanics of molecular physics to electronics, e.g., hydrogen maser, atomic beam resonator

quantum leap a sudden large advance or breakthrough

quantum mechanics the formal mathematical methods of wave mechanics and of matrix mechanics applied to physical problems

quantum number an integral or half integral number belonging to a set of four such numbers denoting the energy level, angular momentum, magnetic moment and spin of a particle, esp. an [illegible] (*PAULI EXCLUSION PRINCIPLE). For such a particle, each of the abovementioned quantities is quantized, the quantum numbers representing the discrete levels of each quantity in which the particle is to be [illegible] (*MOLECULE, *SHELL, *ORBITAL)

quantum physics an approach to physics based on the quantum theory

quantum theory a theory in physics and chemistry based on the assumption that the energy possessed by a physical system is quantized, i.e. it cannot take on a continuous range of values (permitted in classical physics) but is restricted to discrete ones that depend on its dimensions, masses and charges. This hypothesis, made first in the early 20th c. to explain certain per-

plexing phenomena (PEACE, PHOTOELECTRIC EFFECT, PHOTON, QUANTUM, RADIATION) incorporated in the 1920s into different but coincident theoretical formulations (WAVE MECHANICS, MATRIX MECHANICS) which are now regarded as providing a more general theoretical framework than that supporting classical mechanics. Indeed, the latter is considered a special case of quantum mechanics, applying to systems whose dimensions and energies are such as to allow them to exist in quantum states so close together that they may, for purpose of calculation, be regarded as continuous. The quantum theory has progressed to the point where it permeates the whole of physics and chemistry, permitting a unified and often quantitative treatment of a wide range of experimental facts. It has also revealed certain fundamental properties of nature (UNCERTAINTY PRINCIPLE, WAVE-PARTICLE DUALITY) that have profoundly affected current epistemology

quantum theory of fields a modern, relativistic theory of force fields in which the field at some distance from its source is thought of as being carried to that point by a messenger or field quantum. For electrostatic fields this messenger is the photon, for gravitational fields it is the hypothetical graviton. Both these particles have 0 rest mass, travel with the speed of light, and therefore extend their effect to infinity. For the short-range forces observed in nuclei by means of scattering experiments, a type of meson with finite rest mass and therefore limited effective distance was postulated. Several such mesons have since been observed

quap (kwɒp) *n.* a hypothetical nuclear particle of a quark plus an antiproton

quar-an-tine (kwɒrəntiːn, kwɒrəntɪn) **1.** *n.* a period of isolation imposed to lessen the risk of spreading an infectious or contagious disease; a period of detention during which a ship suspected of carrying contagion is allowed no contact with the shore; such a state of isolation imposed on an individual, ship etc.; the place where the ship is detained; a place, esp. a hospital, where people with contagious diseases are isolated. **2.** *v.t. pres. part.* **quar-an-tin-ing** *past* and *past part.* **quar-an-tined** to put in quarantine, to isolate [fr. Ital. *quarantina* fr. *quaranta*, forty]

quark (kwɔrk) *n.* a hypothetical basic subatomic nuclear particle held to be the basic component of protons, neutrons, etc., or a mathematically convenient parameter of a model, coined by American physicist Murray Gell-Mann. *Cf.* ATOM SMASHER, BETATRON, PARTICLE ACCELERATOR, PEP, PETA

quar-rel (kwɔ́rəl, kwɒ́rəl) *n.* (*hist.*) a heavy square-headed arrow, esp. one used with a crossbow [O.F.]

quarrel *pres. part.* **quar-rel-ing,** esp. *Br.* **quar-rel-ling** *past* and *past part.* **quar-reled,** esp. *Br.* **quar-relled** *v.i.* to wrangle, to dispute angrily; to find fault, to *quarrel with someone's suggestions* [O.F. *quereler*]

quarrel *n.* an angry dispute, altercation, disagreement, *what is your quarrel with this definition?*; a cause for complaint, *my real quarrel with him is the way he treats dogs.* **quar-rel-some** *adj.* quick to quarrel [O.F. *querele, querelle*]

quar-ry (kwɔ́riː, kwɒ́riː) *pl.* **quar-ries** *n.* a diamond-shaped pane of glass; a machine-made paving tile [var. of QUARREL (arrow)]

quarry *pl.* **quarries** *n.* the prey of an animal; the victim of a hunt; a person or thing pursued as though the victim of a hunt [fr. O.F. *cuiree, curée* fr. *cuir*, hide]

quarry 1. *pl.* **quar-ries** *n.* an open cavity where stone or slate is extracted. **2.** *v.t. pres. part.* **quar-ry-ing** *past* and *past part.* **quar-ried** to take from a quarry; to make a quarry in; to extract (information) from books, records etc.; *v.i.* to search for information. **quar-ry-man** (kwɔ́riːmən, kwɒ́riːmən) *n.* a person who works in a quarry [fr. M.L. *quareia*]

quart (kwɔrt) *n.* any of various units of liquid or dry capacity, esp. (*Am.*) one equal to ¼ liquid gallon or 57.75 cu. ins.; (*Br.*) one equal to ¼ imperial gallon or 69.355 cu. ins.; a measure of dry capacity equal to 1/32 bushel or 67.200 cu. ins. [F. *quart, quarte*]

quart *QUARTE

quar-tan (kwɔ́rt'n) **1.** *n.* a type of fever characterized by a paroxysm reoccurring every 72 hours. **2.** *adj.* (of a fever) occurring every 72 hours [F. *(fievre) quartaine*]

quarte (kɑːrt) *n.* (*fencing*) the fourth parrying position; a sequence of four

quar-ter (kwɔ́rtər) **1.** *n.* one of four equal parts; a fourth part; a fourth part of an hour; the moment marking this; a fourth part of a year; a fourth of a lunar period; the phase of the moon between the first and second quarter; as between the third and fourth quarter; a period [illegible] fourth of an academic year; (*sports*) one of the [illegible] games are divided; a race over one fourth of a mile; one of four parts, each including a limb, into which a carcass is divided by a butcher; a district in a town, *the Chinese quarter*; a region [illegible] points of the compass, *the wind is moving* [illegible] point or direction of the compass, esp. a cardinal point or division; a source of information, help etc., *don't look for sympathy in that quarter*; (*hist. or fig.*) mercy granted to an enemy or opponent in a contest; the fourth part of a hundredweight (*Br.*); a measure for grain etc. equal to about 8 bushels; 25 cents; a fourth part of a dollar; a coin of this value; the lateral part of a horse's hoof between the heel and the toe; (*naut.*) the fourth part of a fathom; (*naut.*) the afterpart of a ship's side; (*naut.*, esp. *pl.*) one of the stations where men are called for a specified activity, *battle quarters*; (*shoemaking*) the side of a shoe from heel to vamp; (*heraldry*) one of the four divisions of a quartered shield; (*heraldry*) a charge occupying such a division placed in chief; (*pl.*, esp. *mil.*) lodging (of two machine parts) the condition of being at a 90° angle to one [illegible] quarters very near by. **from all quarters, from every quarter** from all directions; from everyone. **2.** *v.t.* to divide into four equal parts; to lodge, assign accommodation to, *he quartered his troops in the school*; to fix, adjust etc. (two parts of a machine) at right angles; (*heraldry*) to bear or arrange (different coats of arms) quarterly on a shield; (*heraldry*) to add (another's coat) to one's hereditary arms; (*heraldry*, with 'with') to place in alternate quarters to; (*heraldry*) to divide (a shield) into parts; (of dogs) to search (the ground) thoroughly in all directions; (*hist.*) to cut (a corpse) [illegible] quarter; (of a machine part) placed at a right angle to another part [O.F.]

quar-ter-back (kwɔ́rtərbæk) *n.* (*football*) the [illegible] where [illegible] behind the [illegible] scrimmage with the fullback and the halfbacks, and who generally calls the signals for the plays

quarter binding a book binding in which the material covering the spine is different from that covering the sides. The material covering the spine extends over the boards up to a quarter of their width (cf. FULL BINDING; cf. HALF BINDING; cf. THREE QUARTER BINDING)

quar-ter-bound (kwɔ́rtərbaund) *adj.* bound in quarter binding

quarter day a day on which a quarterly payment (of rent, interest etc.) is due and a quarterly tenancy begins or ends

[illegible] of a ship's upper deck usually between stern and after mast

[illegible] round before the semifinal of a tournament

quarter horse a horse of a U.S. breed developed [illegible]

quar-ter-ing (kwɔ́rtərin) *n.* (*heraldry*) the arrangement of coats of arms on a shield to show [illegible]

Quartering Act of 1764 a British act of parliament during the ministry of George Grenville, which declared that the American colonists were required to pay for housing British troops in the colonies. Ra·cine (ræsiːn), Jean (1639-99), French dramatist. He was as great a poet as he was a dramatist, developing the Alexandrine as an instrument for the direct expression of intense emotion, in language of great beauty. His plays are based on classical themes and they obey the classical unities and conventions. In the 24 hours of the action the fruit of years, or a lifetime, is reaped, so that the audience is filled with a profound sense of destiny. The motivating force is always love, which is presented as a destructive force dissolving the personality and bringing spiritual disaster. Racine's heroes and heroines analyze their failings with great lucidity, and this lucidity adds to the pathos and feeling of imminent disaster. Racine's greatest plays are: 'Andromaque' (1667), 'Britannicus' (1669), 'Bérénice' (1670) and 'Phedre' (1677)

Radcliffe [illegible] (1934)

radcliffe [illegible] tesquely rouged, haggard under cosmetics [fr.

Ra·detz·ky (rædetskɪ) Joseph, Graf Radetzky von Radetz (1766-1858), Austrian field marshal. He led the Austrian army against Sardinia (1848-9), winning brilliant victories at Custozza (1848) and Novara (1849)

Radhakrishnan (radəkrɪʃnən), Sir Sarvepalli (1888-1976), Indian statesman and educator, president (1962-7). He taught at Oxford (1936-[illegible]) Benares Hindu (1928-[illegible]) and Delhi (1953-62) universities, headed the Indian UNESCO delegation (1946-52), was ambassador to the U.S.S.R. (1949-52), and was vice-president (1952-62) before becoming president. His works include 'Indian Philosophy' (1923-7), 'An Ideal [illegible] View of Life' (1932) and 'Indian Philosophy, Religions and Western Thought' (1939)

ra·di·ac (reidiæk) *adj.* (*mil. acronym*) for radioactivity detection, indication, and computation of various types of radiological measuring instruments, or equipment. —**radiac dosimeter** *n.* an instrument used to measure the ionizing radiation absorbed by that instrument

ra·di·al (réidiːəl) **1.** *adj.* pertaining to a radius ‖ arranged like or resembling radii ‖ having radiating lines, *radial engine* ‖ (*anat.*) pertaining to the radius ‖ moving along a radius **2.** *n.* a radial nerve or artery [fr. L.L. *radialis*]

radial, radial-ply tire, or **radial tire** *n.* a pneumatic tire made with ply casing cords parallel at right angles to the center line and rim

radial keratotomy *med.* a surgical process involving a series of cuts into the transparent corneal tissue, causing a slight bulge, thus improving the focusing ability of nearsighted people; developed by U.S.S.R. scientist Svyatoslav Fydorov in 1980

radial symmetry the state of having an arrangement of similar parts around a median vertical axis, e.g. in jellyfish or starfish

ra·di·an (réidiːən) *n.* a unit of angular measurement, the angle subtended at the center of a circle by an arc equal in length to the radius. Since the circumference of a circle equals 2π times its radius the total angle in a complete turn = 360 = 2π radians [fr. RADIUS]

ra·di·ance (reidiːəns) *n.* the state or quality of being radiant **ra·di·an·cy** *n.* [fr. L.L. or M.L. *radiantia*]

ra·di·ant (reidiːənt) **1.** *adj* emitting energy in the form of electromagnetic waves ‖ shining, bright ‖ bright with, or expressing, great joy, hope etc., *a radiant smile* **2.** *n.* (*astron.*) a point from which a meteor appears to proceed ‖ (*phys.*) a point which is a source of radiant energy [fr. L. *radians* (*radiantis*) fr. *radiare*, to emit rays]

ra·di·ate (reidiːeit) **1.** *v. pres. part.* **ra·di·at·ing** *past* and *past part.* **ra·di·at·ed** *v.t.* to emit (something) in all directions from a central point ‖ *v.i.* to lose energy by emission of waves or particles ‖ to proceed in all directions from a central point, *eight roads radiate from the marketplace* **2.** *adj.* radially symmetrical ‖ having ray flowers [fr. L. *radiare* (*radiatus*), to emit rays]

ra·di·a·tion (reidiːeiʃən) *n.* the act or process of radiating ‖ energy radiated in the form of waves or particles (e.g. the energy in the form of heat and light radiated from an incandescent source) [fr. L. *radiatio* (*radiationis*)]

radiation chemistry the study of the chemical effects of high-energy radiations on matter (cf. RADIOCHEMISTRY)

radiation genetics study of mutations produced by ionizing radiation. *also* radiogenetics

radiation sickness [illegible] by the action of high-energy radiation upon the body, resulting either from radiotherapy or from radioactive debris after an atomic-bomb explosion. Vomiting and fatigue are the first symptoms after exposure, and may be followed later by liability to infection, hemorrhage, prostration and death

ra·di·a·tor (reidiːeitər) *n.* any of various heating or cooling devices [illegible] ‖ any object emitting radiant energy [RADIATE]

rad·i·cal (rædikˈl) **1.** *adj.* relating to or affecting [illegible] essential character of a person or thing, *radical differences* ‖ (*math.*) relating to the root of a number ‖ (*bot.*, e.g. of basal leaves or peduncles) arising from the rhizome, or rootlike stem ‖ [illegible] in society as it is **2.** *n.* (*math.*) a number or quan[illegible] ‖ (*chem.*) [illegible]

(*chem.*) an atom or group of atoms that retains its identity during chemical changes of the rest of the molecule ‖ (*chem.*) a free radical ‖ (*gram.*) the base or root of a word from which other words can be formed ‖ (*politics*) a person of radical views or sympathies [fr. L. *radicalis*]

rad·i·cal·ism (rædik'lizəm) *n.* the state or quality of being radical, esp. in politics ‖ the doctrines or practices of radicals, esp. political radicals

radical right (*U.S.*) extreme conservative movement in politics, e.g., fascism —**radical rightism** *n.* —**radical rightist** *n.*

radical sign the symbol √ or ∛, indicating that the square root is to be extracted from the quantity that follows the sign

radices alt. *pl.* of RADIX

[illegible] ing in a seed, a rootlet of a seedling ‖ (*chem.*) a radical ‖ (*anat.*) a small rootlike origin of a bodily part [fr. L. *radicula*, dim. of *radix*, root]

rad·i·es·the·sia (rædi:esθi:ʒə) *n.* **1.** use of a divining rod, e.g., for water **2.** the capability of using a divining rod **3.** the study of the subject

Ra·di·guet (rædi:ge), Raymond (1903-23), French novelist, author of 'le Diable au corps' (1923) and 'le Bal du comte d'Orgel' (published [illegible])

radii alt. *pl.* of RADIUS

ra·di·o (reidi:ou) **1.** *n.* the transmission and reception of messages by electromagnetic waves broadcasting for public entertainment ‖ a radio receiving set ‖ a message sent by radio **2.** *adj.* operated by radiant energy, esp. electromagnetic waves (of waves) having a frequency between about 10^4 and 3×10^{11} cycles ‖ of or relating to radio or a radio receiving set **3.** *v.t.* to communicate by radio ‖ *v.t.* to send (a message) by radio [shortened from RADIOTELEGRAPHY]

Coded signals, speech, music etc. may be transmitted by superimposing the audible signals on an electromagnetic carrier wave of much higher frequency, so that they vary (modulate) the frequency of the amplitude of the carrier wave. In the receiver the superimposed [illegible] radio frequency band occupies a range of wavelengths from 10^5 to 10^{-1} meters

radio- *prefix* concerning with radiation [radioac- [illegible] thorium isotope resulting from natural decay of [illegible]

ra·di·o·ac·tive (reidi:ouæktiv) *adj.* of, relating [illegible] the property possessed by some natural elements (e.g. radium, uranium) and many synthetic elements (all those with atomic number greater than 92) of spontaneously undergoing nuclear decay, emitting either an alpha particle (reducing their atomic number by 2 and mass number by 4) or a beta particle (increasing their atomic number by 1, leaving their mass number unaltered). Emission of a beta particle is accompanied by the emission of a neutrino, the overall process obeying both energy and momentum conservation. Sometimes emission of either alpha or beta particles leaves the new nucleus in an excited state from which it falls with the emission of a gamma ray. The rates for such nuclear processes, usually indicated by the half life, vary over a tremendous range from a microsecond to a billion years or more. The half life for a radioactive element is an important constant, characteristic of the ele-

radioactive dating a technique for dating ancient objects by evaluating and comparing the [illegible]

radiocarbon age *n.* *Cf.* RADIOCARBON DATING

[illegible] in the radiation intensity of any radioactive

radioactive isotope or **radioisotope** (*nuclear* [illegible]

radioisotopic *adj.* —**radioisotopically** *adv.*

radio astronomy a branch of astronomy dealing with electromagnetic radiation in the range of radio frequencies received (*RADIO TELESCOPE) from objects or regions outside the earth's atmosphere. Radio astronomy has been able, for example, to elucidate the structure of spiral galaxies, since these contain large quantities of hydrogen which emits a strong signal of wavelength 21 cm.

radio beacon a radio station which transmits a special identifying signal to enable esp. an aircraft to fix its position at night or in fog

radio beam a beam of radio-frequency electromagnetic radiation, emitted from a highly directional antenna, used in location and guidance systems

ra·di·o·car·bon (reidi:oukarbən) *n.* radioactive carbon, esp. carbon 14 (*CARBON)

radiocarbon dating a technique for determining the age of ancient material by measuring the proportion of 12C to residual 14C, a constant ratio formed by cosmic radiation in living organisms. 14C has a half-life of 5,740 yrs. *also* carbon dating, carbon 14 dating. *Cf.* RADIOACTIVE DATING

ra·di·o·chem·is·try (reidi:oukémistri:) *n.* the chemistry of radioactive elements and compounds ‖ radiation chemistry

ra·di·o·chro·ma·tog·ra·phy (reidi:oukroumətɔgrəfi:) *n.* measurement of isotope-labeled chemicals by their radioactivity —**radiochromatographic** *adj.*

ra·di·o·e·col·o·gy (reidi:ouikɔlədʒi:) *n.* the study of effects of radiation on plant and animal life —**radioecological** *adj.* —**radioecologically** *adv.* —**radioecologist** *n.*

radio frequency any of a range of electromagnetic wave frequencies used for carrier-wave radio and television transmission

radio galaxy (*astron.*) a group of celestial bodies from which radio energy emissions are detected

ra·di·o·gen·ic (reidi:oudʒénik) *adj.* (*nuclear phys.*) produced by radioactive transformation *Cf.* RADIATION GENETICS

ra·di·o·gram (reidi:ougræm) *n.* a radiograph ‖ a message sent by wireless telegraphy ‖ (*Br.*) a radiogramophone [fr. RADIO- + Gk *gramma*, letter]

ra·di·o·gram·o·phone (reidi:ougræməfoun) *n.* (*Br.*) a cabinet combining radio receiver and a record player

ra·di·o·graph (reidi:ougræf, reidi:ougrɑf) **1.** *n.* an image produced on a fluorescent screen or photographic plate by rays other than those of light, esp. an X-ray photograph **2.** *v.t.* to take an X-ray photograph of **ra·di·og·ra·pher** (reidi:ɔgrəfər) *n.* someone who takes X-ray photographs, esp. for medical purposes **ra·di·o·graph·ic** (reidi:ougræfik) *adj.* **ra·di·og·ra·phy** (reidi:ɔgrəfi:) *n.* the making of X-ray photographs [fr. RADIO- + Gk *-graphos*, written]

ra·di·o·im·mu·no·as·say (reidi:ouimjunouæsei) *n.* (*med.*) diagnostic technique utilizing radioisotopes to measure small quantities of hormones and enzymes present in blood and tissue —**radioimmunoassayable** *adj.* *abbr.* RIA. *Cf.* [illegible] tive isotope

ra·di·o·la·beled (reidi:oulei'bəld) *n.* a material into which a radioactive substance has been [illegible]

ra·di·o·lar·i·an (reidi:oulɛəri:ən) **1.** *n.* a member of *Radiolaria*, an order of highly organized ma- [illegible] ble siliceous skeletons. Their remains form an ooze on the Pacific and Indian Ocean bottoms **2.** *adj.* of a radiolarian [fr. L.L. *radiolus*, dim. of *radius*, ray]

[illegible] ence and practice of identifying distant objects, e.g. aircraft or ships, by radar

ra·di·ol·o·gist (reidi:ɔlədʒist) *n.* a specialist in radiology

ra·di·ol·o·gy (reidi:ɔlədʒi:) *n.* the study of radioactive substances and high-energy radiations (e.g. X-rays, gamma rays), esp. their use in the diagnosis and treatment of disease [fr. RADIO-]

ra·di·om·e·ter (reidi:ɔmitər) *n.* a device to detect or measure electromagnetic radiation, commonly a pivoted set of vanes each with one black and one polished side [fr. L. *radius*, ray + METER]

ra·di·o·paque (reidi:oupeik) *adj.* opaque to ra-

ra·di·o·par·ent (reidi:oupærənt) *adj.* transparent to radiation

ra·di·o·phar·ma·ceu·ti·cal (reidi:oufɑrməsú:tik'l) *n.* a radioactive drug used in therapy, diagnosis, or research

radio pill (*med.*) capsuled radio transmitter used in medical diagnosis for monitoring physiological activity, e.g., pH values in animal digestion

ra·di·o·pro·tec·tive (reidi:ouprətéktiv) *adj.* of a shield that reflects or absorbs radiation to protect against exposure —**radioprotection** *n.* —**radioprotector** *n.*

ra·di·o·re·sist·ance (reidi:ourizístəns) *n.* capability of resisting the effects of radiation, e.g., certain cells. —**radioresistant,** *adj.*

ra·di·o·re·sist·ant (reidi:ourizístənt) *adj.* (esp. of cancer cells) not destroyed by radiation (cf. RADIOSENSITIVE)

ra·di·o·scop·ic (reidi:əskɔpik) *adj.* of or pertaining to radioscopy

ra·di·os·co·py (reidi:ɔskəpi:) *n.* the study of opaque material, esp. by X rays [fr. RADIO- + Gk *skopeın*, to look at]

ra·di·o·sen·si·tive (reidi:ousénsitiv) *adj.* (esp. of cancer cells) able to be destroyed by radiation (cf. RADIORESISTANT)

ra·di·o·sonde (réidi:ousɔnd) *n.* a balloon equipped with a radio transmitter from which information is obtained about atmospheric conditions at high altitudes

radio spectrum the radio-frequency spectrum

radio stars (*astron.*) celestial bodies that are probably made up of turbulent gases and are identified by discrete radio emissions, e.g., a crab nebula, Cygnus A

ra·di·o·sterilization (reidi:oustərəlizéiʃən) *n.* process of sterilizing by use of radiation —**radiosterilize** *v.*

ra·di·o·tel·e·gram (reidi:outéligræm) n. a message sent by radiotelegraphy

ra·di·o·tel·e·graph (reidi:outéligræf, reidi:outélgrɔf) **1.** *n.* radiotelegraphy **2.** *v.t.* to transmit (a message) by means of radiotelegraphy

ra·di·o·te·leg·ra·phy (reidi:outəlégrəfi:) *n.* telegraphy by means of radio waves

ra·di·o·te·lem·e·try (reidi:outəlémitri:) *n.* measurement of distance by radio transmission. —**radiotelemetric** *adj.* *Cf.* BIOTELEMETRY

ra·di·o·tel·e·phone (reidi:outélifoun) *n.* a transmitter for radiotelephony

ra·di·o·te·leph·o·ny (reidi:outəléfəni:) *n.* sound transmitted by radio waves. The sound is converted by a microphone into electrical impulses which are superimposed on a continuous carrier wave, esp. a microwave. The receiver, after amplification and rectification of the carrier wave, passes the resulting direct current through a telephone, which reconverts the impulses into sound

radio telescope an instrument for studying radio signals of cosmic origin (particularly the 21-cm. hydrogen radio line). It consists of an antenna (usually a large paraboloid, mounted on a heavy, vibration-free, mechanically steerable base) for capturing and focusing the cosmic signal, and a receiver for amplifying and rectifying it (*RADIO ASTRONOMY)

ra·di·o·tel·e·type (reidi:outélitaip) *n.* communication by radio-operated telegraphy connected to a typewriter *abbr.* RTTY

ra·di·o·ther·a·pist (reidi:ouθérəpist) *n.* a specialist in radiotherapy

ra·di·o·ther·a·py (reidi:ouθérəpi:) *n.* the treatment of malignant tumors and certain other diseases by means of X rays and radioactive substances

ra·di·o·thon (reidi:ouθɔn) *n.* a long-continuing radio program in support of a cause, usu. to raise funds

ra·di·o·tox·ic (reidi:outɔksik) *adj.* of toxic effects of radiation —**radiotoxin** *n.* the poison in irradiated chemicals —**radiotoxologic** *adj.* of the study of radiotoxins

[illegible] *sativus* (or *Raphanus sativus*) fam. *Cruciferae*, an annual plant with a basal rosette of leaves, and a tuberous taproot esteemed for its pungent, crisp flesh ‖ this root [O.E. *rædic, redic* fr. L.]

ra·di·um (reidi:əm) *n.* a shining white, divalent metallic element (symbol Ra, at. no. 88, mass of isotope of longest known half-life 226) which is strongly radioactive, disintegrating into radon. It was first isolated by Pierre and Marie Curie. It is used in radiography and radiotherapy and in the making of luminous paints etc. [Mod. L. fr. *radius*, ray]

ra·di·us (reidɪəs) *pl.* **ra·di·i** (reidɪ,ai), **ra·di·us·es** *n.* a straight line drawn from the center of a circle or sphere to any point on its circumference or surface; the length of this line ‖ a radiating part, e.g. a spoke of a wheel ‖ any of a number of lines diverging from a central point ‖ a measured or indicated by a radius, *he knows all the bars in a 15-mile radius* ‖ (*anat.*) the shorter of the two bones of the forearm in man, or the corresponding bone in an animal's forelimb or bird's wing. In some vertebrates it is fused with the ulna ‖ the ray or outer zone of petals of a composite flower, e.g. the daisy ‖ an insect-wing vein [L.=spoke, ray]

radius of gyration the square root of the mean squared distance of the particles of a pivoted body from the pivot point (*MOMENT OF INERTIA)

radius vector *pl.* **radii vec·to·res** (vektəraiz, vektóuri:z) (*math.*) a line, or the length of a line, from a fixed point to a variable point ‖ (*astron.*) a straight line between a star or planet and a heavenly body describing an orbit around it

ra·dix (réidiks) *pl.* **rad·i·ces** (rædɪsi:z, reidɪsi:z), **ra·dix·es** *n.* a number or value used as the basis for a scale of numeration, measurement etc., *10 is the radix of the decimal system* ‖ (*bot.*) the root of a plant ‖ (*anat.*) a radicle [L.=root]

RADNO (*acronym*) (transposed) for *No Radio*, fadeout of reception in arctic areas believed to be the result of solar explosions

Rad·nor·shire (rædnərʃiər) (*abbr.* Radnor) a county (area 471 sq. miles, pop. 18,000) in N Wales. County town: Presteigne (pop. 1,000) Administrative center: Llandrindod Wells (pop. 3,000)

Ra·dom (rádɔm) a town (pop. 183,600) in Poland, 60 miles south of Warsaw: metallurgy, chemicals, tanning, mechanical engineering

ra·dome (*acronym*) for radar dome, a radar antenna housing made of insulation material that permits passage of radio frequency radiation

ra·don (réidɔn) *n.* a radioactive gaseous element (symbol Rn, at. no. 86, mass of isotope of longest known half-life 222) formed by the disintegration of radium ‖ a radioactive gas released from the earth, esp. before an earthquake [RADIUM]

rad·u·la (rædʒulə) *pl.* **rad·u·lae** (rædʒuli:) *n.* a short broad strip of membrane bearing rows of chitinous teeth, found in the mouths of most gastropod mollusks [L.=scraper]

Rae·burn (réibərn), Sir Henry (1756-1823), Scottish portrait painter who made many paintings of contemporary leading Scottish figures, esp. in Edinburgh

Raetia *RHAETIA

raf·fi·a (ræfi:ə) *n.* the fiber obtained from the leaves of *Raphia ruffia*, the low-growing raffia palm of Madagascar. It is used for matting, tying up plants etc. [Malagasy]

raf·fi·né (ræfi:néi) *adj.* (*Fr.*) highbrow, ultra-refined

raf·fish (ræfiʃ) *adj.* (of appearance) flashily attractive without breeding or style ‖ (esp. of men) somewhat disreputable, in a flashy way [fr. older *raff*, a low fellow]

raf·fle (ræfəl) **1.** *n.* a lottery in which numbered tickets are sold to a large number of people, the holder of a ticket selected at random qualifying for a prize **2.** *v. pres. part.* **raf·fling** *past* and *past part.* **raf·fled** *v.t.* (usually with 'off') to sell by raffle ‖ *v.i.* to take part in or conduct a raffle [F *rafle*, a dice game]

raffle *n.* (*naut.*) a jumble of ropes, canvas etc [perh. fr. O.F. *rafle* used in phrase *rifle ou rafle*, anything at all]

Raf·fles (ræfəlz), Sir Thomas Stamford Bigley (1781-1826), British colonial administrator. He was lieutenant governor of Java (1811-16). He acquired Singapore for Britain (1819)

raft (ræft, rɑft) **1.** *n.* a floating platform used for transportation over water or moored as a diving platform or landing stage ‖ a number of casks, logs etc. lashed together for floating down a river ‖ a mass of floating driftwood, ice etc. **2.** *v.t.* to transport on a raft ‖ to make into a raft ‖ to cross (a river) on a raft ‖ *v.i.* to work a raft ‖ to go by raft [O.N. *raptr*, rafter]

raft *n.* (*pop.*) a lot, large number [fr. older *raff*, a jumble]

raf·ter (raftər, rɑftər) *n.* one of the sloping beams forming the framework of a roof [O.E. *ræfter*]

raft·er *n.* a man who forms rafts out of logs

rafts·man (ræftsmən, rɑftsmən) *pl.* **rafts·men** (ræftsmən, rɑftsmən) *n.* someone who works a raft or works on a raft

rag (ræg) *n.* a torn, tattered or worn scrap, piece of cloth, article of clothing etc. ‖ (*pl.*) shabby, [illegible] cleaning or polishing ‖ (*pop., pejorative*) a newspaper

ragged *v.t.* to tease ‖ to scold ‖ (*Br., pop.*) to play practical, esp. rough, jokes upon ‖ *v.i.* (*Br., pop.*) to engage in horseplay **2.** *n.* (*Br., pop.*) a show of horseplay by students, with dressing up and fooling around to get money for some charity

rag *n.* a large roofing slate with one rough surface ‖ any of various kinds of hard, coarse stone which split into thick, flat slabs (perh. RAG)

rag·a·muf·fin (rægəmʌfin) *n.* a ragged, disreputable person, esp. a street urchin [prob. fr. RAG]

[illegible] or car goes through the streets collecting old clothes or junk

rag·a·rock (rægərɔk) *n.* a mixture of rock 'n roll and Indian musical forms, often played with a sitar

[illegible] prevent its easy withdrawal

rage (reidʒ) *n.* violent and uncontrolled anger, or a fit of this ‖ (*rhet.*) the violence of a natural element ‖ (*rhet.*) passionate desire for something, *the rage for conquest* ‖ intense emotion, passion, *a rage of grief* ‖ an object of modish enthusiasm, *big hats were the rage* [F. *raige*, *rage*]

[illegible] **raged** *past part.*

raged (often with 'at', 'over' or 'against') to utter with violent and uncontrolled anger ‖ (of a storm, sea, battle, disease, passion etc.) to be [illegible]

rag·ged (rægid) *adj.* (of fabric, clothes etc.) torn or frayed ‖ (of hair, fur etc.) rough, hanging in tufts ‖ having a broken, jagged outline or surface ‖ written or performed in an uneven way ‖ (of people) dressed in torn or frayed clothes

ragged robin *Lychnis flos-cuculi*, fam. *Caryophyllaceae*, a perennial plant with small pink flowers with five narrow-lobed and ragged-looking petals

rag·gee, rag·i (rægi:) *n. Eleusine coracana*, fam. *Gramineae*, a cereal cultivated in India and Africa for flour [Hindi *rāgī*]

Rag·lan (rægləŋ), Fitzroy James Henry Somerset, 1st Baron (1788-1855), British field marshal. He commanded (1854-5) the British troops [illegible]

rag·lan (rægləŋ) *adj.* (of sleeves) made with the seams running from the underarm to the neck so that there are no shoulder seams ‖ (of coats etc.) having such sleeves [after Lord *Raglan*]

rag·man (rægmæn, rægmən) *pl.* **rag·men** (rægmen, rægmən) *n.* a man who collects or deals in rags, old newspapers etc.

ra·gout (rægu:) *n.* a highly seasoned dish of [illegible]

rag·pick·er (rægpikər) *n.* a person who picks up rags and other refuse for a living

rag·tag (rægtæg) *n.* (*pop.*) a crowd of poor, dirty [illegible] raff

rag·time (rægtaim) *n.* a type of early jazz popular in the two decades before the 1st world war. It derived from black folk music and is marked by persistent syncopation [ragged time]

rag·weed (rægwi:d) *n.* ragwort ‖ a member of *Ambrosia*, fam. *Compositae*, a genus of plants whose pollen may cause hay fever and asthma

[illegible] fam. *Compositae*, a genus of plants growing in fields and hedgerows, with lyrate leaves and clusters of bright yellow flowers, esp. *S. jacobaea*

raid (reid) **1.** *n.* a swift, sudden military attack with a limited objective, esp. by a detachment ‖ air raid ‖ a swift, sudden robbery of money, goods, cattle etc., esp. in broad daylight ‖ a sudden swoop on suspected premises by law enforcement officers to arrest criminals, seize contraband etc. (*stock exchange*) an attempt by dealers to force prices down **2.** *v.t.* to make a raid upon ‖ *v.i.* to make a raid [orig. Scot. fr. [illegible] support in climbing stairs etc. or for a guard or barrier ‖ a horizontal piece in a fence or in paneling ‖ the fence on either side of a racetrack ‖ a line of a track on which, or suspended from which, a vehicle moves ‖ (*naut.*) the wide wooden bar along the top of the bulwarks **by rail** by railroad train **on the rails** progressing satisfactorily, going along well **over the rail** [illegible] **to go off the rails** (*fig.*) to stop behaving with propriety **2.** *v.t.* (with 'in', 'off') to separate from an adjoining or surrounding space by a rail [O.F. *reille*]

rail *v.i.* (*rhet.*, with 'against' or 'at') to utter curses and lamentations, *to rail against fate* ‖ (with 'at') to shout abuse [F. *railler*, to banter]

[illegible] regions, with thin bodies, strong legs and short wings, constituting a subfamily of fam. *Rallidae*. They have a cosmopolitan [F. *rale*]

rail chair one of the iron clamps fastened to the sleepers which hold the tracks of a railroad

rail·gun (reilgan) *n.* device under development for projecting a plastic missile (bullet, rocket) utilizing a magnetic flux generator with a direct current linear motor fired by a pulse of high-voltage electrical energy with 10 times the power of a rifle

rail·head (réilhed) *n.* the furthest point reached by a railroad under construction ‖ (*mil.*) the point on a railroad at which supplies are unloaded and sent up to front-line troops by other means

[illegible] consisting of rails or a rail ‖ material for rails

rail·ler·y (réilərɪ) *n.* good-humored teasing [F. *raillerie*]

rail·road (reilroud) **1.** *n.* (*Am.–Br.* railway) a road or system of roads of easy gradient on which parallel rails are laid, and held in position by being bolted to ties, for trains to run on **2.** *v.t.* to transport by railroad train ‖ (*pop.*) to rush (something) through quickly so that it cannot receive careful consideration ‖ (*pop.*) to cause (someone) to be sent to prison on a false [illegible]

—The first surface railroad designed for passenger transport was constructed between Stockton and Darlington, in England, in 1825 (*STEPHENSON). U.S. railroads began effectively with the Baltimore and Ohio Railroad (1830)

rail·way (réilwei) *n.* (*Br.*) the organization concerned with running a regional system of railroads ‖ the tracks of such a regional system ‖ a rail line which carries equipment over a relatively small area

rai·ment (réimənt) *n.* (*rhet.*) clothing, esp. of fine quality [fr. older *arrayment* fr. ARRAY]

rain (rein) *n.* a multitude of falling drops of water formed by the coalescing of droplets in a cloud ‖ the fall of such drops ‖ a fall of other liquid drops, dust particles, bullets etc. ‖ (*pl.*) the season of heavy rain, esp. in countries with a monsoon climate [O.E. *regn, ren*]

rain *v.i.* (usually impersonal) to fall as rain, *it is raining* ‖ to fall like pouring rain ‖ *v.t.* to cause to fall like pouring rain **to rain cats and dogs** to rain very hard [O.E. *regnian*]

rain·bow (reinbou) **1.** *n.* a circle (usually observed as an arc) of concentric bands in the atmosphere in the colors of the spectrum, due to the reflection and refraction of sunlight in [illegible] **2.** *adj.* colored like a rainbow, many-colored [O.E. *regnboga*]

rainbow pill (*med.*) a capsule containing drugs [illegible] effective at various times

rainbow trout *Salmo gairdneri*, fam. *Salmonidae*, a brightly colored trout, native to the mountain streams and the rivers of the Pacific [illegible] North America

Reagan (reigən), Ronald Wilson (1911-), U.S. statesman and actor, 40th president (1981-). Born in Tampico, Ill., he went to Eureka College and then to Hollywood (1937) where he appeared in 53 films and also served as president of the Screen Actors' Guild (1952, 1959-60). He also hosted the TV series 'Death Valley Days' (1961-2). Finding that his views had become more conservative, he ran for governor of California on the Republican ticket in 1966 and, defeating incumbent Democrat Pat Brown, served in that post for eight years (1967-75). He opposed tax increases and government spending and left office with a considerable budget surplus. The Republican nominee in the 1980 presidential election, he chose George Bush as his running mate, won by a near-landslide victory and was decisively re-elected in 1984. As president he worked to revamp the U.S. economy, stem inflation, produce tax cuts and increase the country's defenses, and he took a firm stand against the Soviet Union and terrorist tactics. —Although the Reformation was a religious movement in origin, its course was much influenced by political and economic factors. Wyclif and Hus had prepared the way for it, and by the end of the Middle Ages many were convinced that the Church needed reforming. Circumstances favorable to the Reformation included humanism and the Renaissance (which encouraged a new critical spirit), the invention of printing (which aided the spread of ideas), the reaction of princes and jurists against the temporal encroachments of the papacy, the growing wealth of the clergy (esp. in Germany), and the religious and moral shortcomings of certain sections of the clergy. The leaders of the Reformation sought to restore Christianity to its early purity by submitting ecclesiastical tradition to the test of Scriptural authority.

The Reformation was begun in Germany (1517) by Luther, who at first thought reform possible without schism. His attack on the papacy and his refusal to recant led to his excommunication (1521). The Augsburg Confession (1530) defined Lutheran doctrine, of which the main points were justification by faith and the sovereign authority of the Scriptures in matters of faith. The German nobles adopted the new ideas, enabling themselves to appropriate Church property and to challenge the authority of the Emperor as members of the Schmalkaldic League. [illegible] were condemned by the Council of Trent and defeated in the Schmalkaldic War. The Peace of [illegible] of Lutheranism in Germany. The conflict later became merged in the Thirty Years' War.

From Saxony, Lutheranism spread into Prussia and the Slav provinces of the Baltic, and was adopted by Denmark, Sweden, Norway and Iceland. The Reformation was preached in Switzerland by Zwingli and in France by Calvin. [illegible] Protestants did not win religious freedom [illegible] tions of Switzerland, in Scotland under Knox, and in Flanders and the Netherlands despite

the persecutions of Philip II. England rejected papal control (1534) under Henry VIII, veered towards Calvinism under Edward VI, and, after the [illegible] compromise of the Elizabethan Church settlement [illegible]

The Reformation tended to increase the growth of nationalism and to strengthen the economic position of the mercantile class. Within the Roman Catholic Church it led to the Counter-Reformation.

Dutch baroque painter and etcher, one of the greatest masters of European art. He became famous and successful esp. as a portrait painter [of the rich bourgeois society of the Holland]. But as his art matured the portraits became less flattering, less obviously brilliant, and patronage declined. The most obvious characteristic of Rembrandt's art is the use of a single, hidden source of light falling like a shaft into spacious shadows, creating a single focus, or reflected from a few highlights. The tones are somber but more jewellike because of the contrast of light and shade. The subject is often motionless, but again made more dramatic by this contrast. There is a love of exotic costume (turban, golden helmet, plume, rich robe) and of striking architecture (vault or pillar lost in shadow at the top of the picture and dramatically defining the human groups below), but these are used as settings for human experience. No artist saw more clearly or realized more deftly the poignant human meaning of a biblical scene. The drama is never merely theatrical. It is felt as truth and marvelously captured, especially in the easy, amazingly fast line of the drawing, or the etchings. The bodily pose and facial expression belie in their homeliness and truth the grandeur of the trappings. Especially in portraits of the aging, and in his many self-portraits, he saw the battered vessel of a hard-won spirituality, beyond pity

re·nais·sance (rɪnéisəns, rɪnéisɑ:ns) *n.* revival or rebirth **Renaissance** 1. *n.* the artistic, literary and scientific revival which originated in Italy in the 14th c. and which influenced the rest of Europe in many ways in the next two centuries. Broadly, it was typified by the spread of humanism, a return to classical values and the beginning of objective scientific inquiry ‖ this period of history, considered as intermediate between the Middle Ages and modern times 2. *adj.* of or relating to the Renaissance or its style in art, architecture, etc. [F.]

The term 'Renaissance' was given currency in the 19th c. by Burckhardt, who emphasized the contrast between the Church-centered culture of the Middle Ages and the new sense of the primacy of personality of 14th-c. Italy. More recent research sees the Italian Renaissance as the result of gradual change rather than as a break with the past, and emphasizes earlier cultural revivals in the Middle Ages. The political and economic situation of Italy in the 14th c. was peculiarly favorable to the development of the Renaissance. The presence of a wealthy leisured class of merchants and bankers made secular patronage of men of genius possible. The [illegible] were ruled by humbler [illegible] Medici [illegible] the arts was often a means of justifying their otherwise weak title to political power. In Florence in the 14th c., Petrarch and Boccaccio revived interest in humanist and classical learning, while Giotto brought a new realism to art. In the 15th c. the invention of printing, and the founding of libraries and academies by princes and popes, helped to spread the new ideas. Uccello, Fra Angelico, Botticelli and Pollaiuolo excelled in painting, Donatello and Ghiberti in sculpture and Brunelleschi in architecture. The Renaissance reached its height in the 16th c., esp. under the patronage of Julius II and Leo X, with Michelangelo, Leonardo da Vinci and Raphael in Rome and Giovanni Bellini and Titian in Venice. Ariosto and Tasso used Italian for epic poetry, and Machiavelli brought a new approach to political thought. Palestrina was the glory of Renaissance music. The Italian Wars (1494–1559) ended political stability, but were effective in spreading the Renaissance to other parts of Europe. In France the Renaissance gave rise, under the patronage of François I, to the chateaus of the Loire valley and to the writings of Ronsard and Rabelais, and, later, to those of Montaigne. In Germany and the Netherlands, the dominant literary figure was Erasmus, while the critical spirit of the Renaissance may be said to have contributed to the development of the Reformation. Durer, Holbein and the Bruegel family dominated in the arts. In Spain the leading figures were El Greco, Cervantes and Lope de Vega. In England the influence of the Renaissance is seen in Colet and More as well as in Shakespeare and Marlowe. The new scientific spirit of inquiry was fruitful esp. in astronomy with the work of Copernicus and Galileo, and in the new studies in [illegible] and philology. The Renaissance created a culture which, though based in large part on the imitation of the ancients, freed men to prove and enjoy the world in a way not possible under the medieval Church's dispensation. In this release lay the way of development of the modern world

Revolutionary War (*Am.–Br.* War of American Independence) the struggle (1775-83) of the Thirteen Colonies of America for independence from British rule. The war was caused by British attempts to tax the colonies for revenue without representation in Parliament and to make them pay for a standing army. The colonies' dependence on Britain was lessened when the Treaty of Paris (1763) removed the French and Indian threat. The colonies revolted (1775) under Washington and declared their independence (1776). Burgoyne's surrender at Saratoga (1777) encouraged France to declare war on Britain (1778), followed by Spain (1779) and the Netherlands (1780). Britain lost command of the sea, and her army was finally defeated at Yorktown (1781). Britain regained naval supremacy (1781-2) and the war ended with the Treaty of Paris (1783), in which the independence of the U.S.A. was recognized. The war discredited George III's government, weakened France financially, and served as an inspiration for the French Revolution and for revolutions in Spanish colonies in America

Riley (raili), James Whitcomb (1849-1916), U.S. poet who wrote in the dialect of his native Indiana

Ril-ke (rilkə), Rainer Maria (1875-1926), German lyric poet born in Prague. Central to his poetry was the quality of European life, which he saw as menaced by an encroaching mechanistic utilitarianism symbolized by the U.S.A. The two greatest of his works were the 'Sonnets to Orpheus' (1923) and the 'Duino Elegies' (1923), which are both a sustained meditation and a series of variations on certain themes, or indeed on the whole of life: a life without the Christian god, in which a religious attitude has to be recreated. Meaning and value are restored through the contemplation in particular of what artists, lovers and the great dead have made of life and of death, by the contemplation at the humbler level of the accumulated treasure of significance with which all the past has loaded every object in an old continent, and by the acceptance of death as the other side of life. But the themes are not to be divorced from the verse, which is richly metaphorical, the originality of the language springing directly from the forms and natural workings of German. He surrendered himself to thought to initiation in his verse, and he was perhaps the last and one of the greatest exponents of the romantic theory of inspiration

Rim-baud (rēbou), Arthur (1854-91), French poet. His literary works, including 'le Bateau ivre' (1871), 'les Illuminations' (published in 1886) and 'Une saison en enfer' (1873), were all written before he was 20. The last 16 years of his life were spent mainly in Ethiopia, where he became a trader. His influence has been profound: as a type of the world-forsaking visionary artist, of the inspired youthful genius, of the 'outcast' or scandalous bohemian, and of the poet as oracle. His poetry sprang from, as he said, a systematic transformation of the function of the senses, and a naturally oblique and figurative habit of expression

Roman Catholic 1. *adj.* of or pertaining to the Roman Catholic Church **2.** *n.* a member of this Church

Roman Catholic Church that part of the Christian Church which accepts the authority of the pope, in distinction to the Orthodox Eastern Church, which separated from it in 1054, and to the Protestant Churches, which broke away in the 16th c. (For the early history of the Church *CHRISTIANITY.) The Roman Catholic Church rose to be a great political force in the Roman Empire (4th c.) and dominated Western Europe throughout the Middle Ages. Attacks on the Church culminated in the Reformation. The Counter-Reformation produced administrative and educational reforms within the Church, and missionary activities were extended under the Jesuits in the Far East and America. From the Council of Trent (1545-63) to the Vatican Council (1869-70) the Church was on the defensive against the incursions of rationalism, enlightenment, liberalism and revolution. In the 20th c. it has begun to reconsider its ideological traditions and to participate in the ecumenical movement. The excommunication of the Orthodox Eastern Church was annulled (1965). Distinctive tenets of Roman Catholicism are the authority of ecclesiastical tradition, transubstantiation, the seven sacraments, papal infallibility, purgatory, the Immaculate Conception (1854) and the Assumption (1950) of the Virgin Mary. Theology is based on natural and divine law as established by Thomas Aquinas. The clergy are celibate, though in E. Europe and the Middle East there are Roman Catholic Churches with Uniate rites and noncelibate clergy. Many religious orders exist. There are several hundred million Roman Catholics in the world. They preponderate (over 85%) in Spain, Ireland, Luxembourg, Belgium, Portugal, Italy, Latin America, Austria, Poland and France. They form large minorities (over 30%) in the Netherlands, Czechoslovakia, Hungary, Switzerland, West Germany, Lebanon, Yugoslavia, the Philippines, Canada and the U.S.A. Smaller minorities exist in Australia, New Zealand, East Germany, Rumania, Great Britain and the U.S.S.R.

Starting from the ideas and attitudes of Rousseau in France and from the Sturm und Drang movement in Germany, it held that classicism, dominant since the 16th c., denied expression to man's emotional nature and overlooked his profound inner forces. Romanticism is above all an exaltation of individual values and aspirations above those of society. The movement looked to the Middle Ages and to direct contact with nature for inspiration, and it was responsible for the national liberation movement of 19th-c. Europe. The leading Romantic poets were Byron, Keats, Shelley, Wordsworth, Hugo, Musset, Heine and Novalis. In painting its chief exponent was Delacroix. Beethoven, Schubert, Berlioz and Bizet were great Romantic composers. Through its concern with the hidden forces in man, Romanticism exerted a profound influence on modern thought, and opened the way e g. to psychoanalysis. Roo·se·velt, Franklin Delano (1882-1945), 32nd president (1933-45) of the U.S.A., a Democrat. Beginning with a general 'bank holiday', he initiated the New Deal in order to restore the economy after the great depression of 1929. His 'fireside chats', broadcast by radio to the nation, helped him to maintain the support and confidence of the American people. He led the U.S.A. away from isolationism with his good-neighbor policy toward Latin America, his recognition (1933) of the U.S.S.R., and his lend-lease support (1941) for Britain. He became (1940) the first U.S. president to run for a third term in office. With Churchill he drafted (1941) the Atlantic Charter and, as the power of the Axis increased, he augmented U.S. military strength and preparedness, issuing the first peacetime selective service act in U.S. history. With the Japanese attack (1941) on Pearl Harbor, he brought the U.S.A. into the 2nd world war. He attended conferences with Allied leaders at Casablanca (1943), Quebec (1943 and 1944), Cairo (1943), Tehran (1943) and Yalta (1945). Roosevelt, Theodore (1858-1919), 26th president (1901-9) of the U.S.A., following the assassination of President McKinley. He was a Republican. During the Spanish-American War he organized the regiment of volunteers known as the Rough Riders, and gained wide fame as a cavalry colonel in Cuba (1898). As president he launched an extensive 'trust-busting' campaign, promoted the conservation of natural resources, and through his Roosevelt Corollary to the Monroe Doctrine he maintained the right of the U.S.A. to intervene in the internal affairs of Latin American countries for the maintenance of law and order. He also pursued a policy of 'dollar diplomacy', notably in the Caribbean. He used the U.S. Navy (1903) to ensure that Panama gained independence from Colombia, and secured the right to construct the Panama Canal. He received the Nobel peace prize (1906) for his mediation in the Russo-Japanese War (1904-5). At his initiative the Algeciras Conference (1906) was called. Opposed to the reelection of conservative Republican President Taft, he organized (1912) the Progressive or 'Bull Moose' party, running as its candidate in the 1912 presidential elections and thus splitting Republican ranks, which allowed a Democratic victory. During the 1st world war he vigorously attacked President Wilson's initial policy of neutrality.

Roosevelt Corollary an extension of the Monroe Doctrine issued (1904) by President Theodore Roosevelt and Elihu Root. It asserted U.S. right to intervene in the internal affairs of Latin America to maintain peace and order. It is the most imperialistic interpretation of the Monroe Doctrine.
